Appendix H: Percentages of People Responding to Section II of the Survey
Graph IX-1: Consumer Responded by Mover

The graph above illustrates the percentage of M2 who responded to Section II of the survey (38%) compared to CS2/OCR (64%). The difference was statistically significant.
The graph above illustrates the percentage of M2 who responded to Section II of the survey (39%) compared to L2 (18%). The difference was statistically significant.
Graph IX-3: Consumer Responded by Level of ID

The graph above illustrates the percentage of people who responded to Section II of the survey by level of ID: no ID (84%), mild ID (88%), moderate ID (61%), severe ID (24%), and profound ID (14%).
The graph above illustrates the percentage of people with an ASD who responded to Section II of the survey (50%) compared to individuals without an ASD (65%). The difference was statistically significant.
The graph above illustrates the percentage of people with CP who responded to Section II of the survey (50%) compared to individuals without CP (66%). The difference was statistically significant.
The graph above illustrates the percentage of people with epilepsy who responded to Section II of the survey (50%) compared to individuals without epilepsy (68%). The difference was statistically significant.
