

EVALUATION ELEMENT

A. SKILLS DEMONSTRATED IN DAILY LIFE

These questions address the consumer's level of skill in tasks necessary for daily living. The response options for each question represent increasing skill. Select the level that best matches the behavior most often displayed by the consumer during the past 6 months, not the highest level he or she has demonstrated. If two adjacent answers apply, and they describe patterns that have been observed equally often, choose the higher level of performance. Do not adjust for age or other factors that might affect skill development. Behaviors during previous periods should not be considered.

When a question mentions **familiar settings**, it refers to a residence, school, day program, work site or other settings the consumer frequents on a routine basis. All other situations are considered to be **unfamiliar**. The term **assistance** refers to help given to a consumer who is performing a task mostly on his / her own, and **supervision** applies to situations in which a consumer performs a task independently, but someone must check to make sure it is done correctly. A **reminder** is a prompt given to a consumer who knows how to perform a task, but may forget to do so.

Please use the best informant available for each question. It is important that the person(s) providing information for this section be sufficiently knowledgeable about the relevant aspect of the consumer's life to provide an accurate and unbiased picture. In most cases, this will be someone who has directly observed the consumer's daily behavior for at least one week within the preceding six months.

If you are unable to provide a response to a question, please explain why.

If for any reason the question is not appropriate for the consumer, record *Question Does Not Apply (N)*.

If a knowledgeable person is not available to provide information, record *Current Information Not Available (Q)*.

These questions are written to be understood and answered by service coordinators. Do not read them to consumers, family members, or caregivers verbatim. Instead, use your own words to request the information that you need to answer the question.

Behaviors during previous periods should not be considered.
