## Supported Living Services (SLS)

Consumer Numbers and Purchase of Service Costs  
through Fiscal Year 2008-2009

Community Support Section  
Community and Quality Management Branch  
Community Services and Supports Division

This report is available at [www.dds.ca.gov](http://www.dds.ca.gov)

# **SLS Consumer Numbers and Purchase of Service Costs Fiscal Year 2008-2009**

**Table of Contents**

96-97 to 08-09 SLS Consumer Growth (graph)..... 1

Statewide Average Supported Living Arrangement Costs 96-97 to 08-09 SLS Costs (graph)..... 2

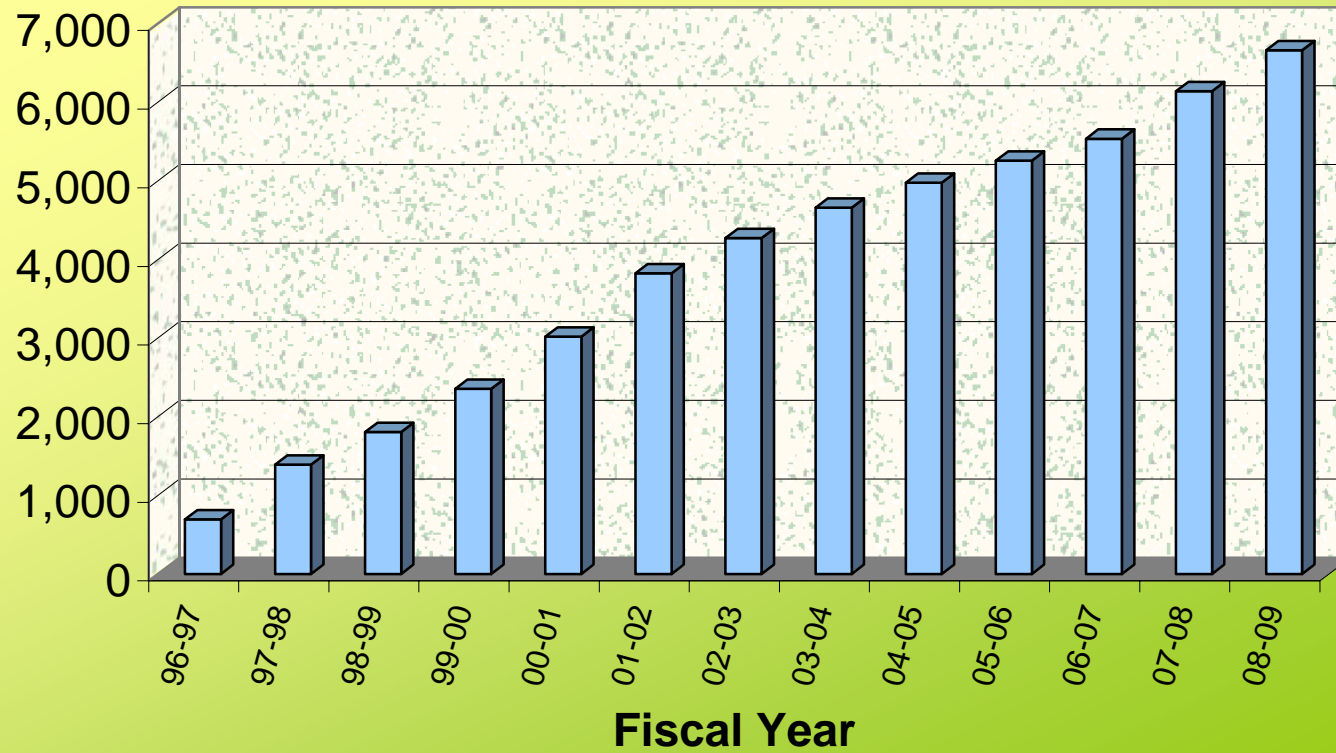

Purchase of Service Costs Statewide and by Regional Center ..... 3

Comparison of Fiscal Years 2006-2007 and 2008-2009 ..... 4-7

1996-2009 Historical Data. .... 8-15

Age Group of Consumers - Purchase of Service Costs by Regional Center ..... 16-20

## Growth in SLS Consumers

### Statewide Average SLA Costs FY 96-97 to FY 08-09

NOTE: This table presents data for consumers receiving Supported Living Service (SLS) through the entire fiscal year 2008-2009 which were billed to service code 896. Only consumers for whom such costs were reported in the first and last months of fiscal year 2008-2009 were included in our analysis, under the presumption that these consumers received Supported Living Services for the full year. Since costs are reported in arrears, some data variance may occur due to when the data is collected. Data collection occurs within the first quarter of the calendar year; allowing costs reported 6 months after the end of the fiscal year to be represented. This table also includes consumers who received services in addition to SLS (i.e. transportation, day program, etc; represented in the "Other Service Codes" column). The combination of SLS Service and Other Service codes represents a consumer's Supported Living Arrangement (SLA). Statewide numbers reflect SLA Purchase Of Service (POS) expenditures and consumer numbers regardless of consumer Supported Living Arrangement (SLA). Statewide numbers reflect SLA POS expenditures and consumer numbers regardless of consumer catchment area movement. Regional center numbers reflect only SLA POS expenditures and consumer numbers that are regional center specific and does not capture total SLA POS expenditures for consumers who received services in more than one catchment area. The sum total number of consumers reported by regional center may slightly exceed the total number of consumers reported on the statewide line due to this variance in data collection. Source data POS.

NOTE: This table compares the number of SLS consumers and the costs of their services during FY 2007-2008 with that of FY 2008-2009 which were billed to service codes 891-894 and 896. This table also include consumers who received services in addition to SLS (i.e. transportation, day program, etc.; represented in the "Other Service Codes" column). The combination of SLS Service and Other Service codes represents a consumer's Supported Living Arrangement (SLA). Only consumers for whom such costs were reported in the first and last months of either, or both, fiscal years were included in our analysis, under the presumption that these consumers received SLS services for the full year. Statewide numbers reflect SLA Purchase of Service (POS) expenditures and consumer numbers regardless of consumer catchment area movement. Regional center numbers reflect only SLA POS expenditures and consumer numbers that are regional center specific and does not capture total SLA POS expenditures for consumers who received services in more than one catchment area. The sum total number of consumers reported by regional center may slightly exceed the total number of consumers reported on the statewide line due to this variance in data collection. Since costs are reported in arrears, some data variance may occur due to when the data is collected. Data collection occurs within the first quarter of the calendar year; allowing costs reported 6 months after the end of the fiscal year to be represented. Source data POS.

NOTE: This table compares the number of SLS consumers and service costs for FY 1996-1997 through 2008-2009. Only consumers for whom such costs were reported in the first and last months of the fiscal year were included in our analysis, under the presumption that these consumers received SLS for the full year. The count excludes consumers who received SLS from an agency that was paid through a contract including more than one individual. During the fiscal years from 1996-1997 through 1999-2000, service codes 891-894, and 073 (Parent-Coordinated SLS) were considered as constituting SLS. Beginning in FY 2000-2001, service code 073 was not counted as SLS, and a new SLS service code, 896, was added after it became operative in July 2000, as a replacement for service codes 891-893. Service code 894 remains in use as an alternative way to report SLS administrative costs. The net effect of discarding service code 073 for the purposes of this report is unclear. Additionally, changes in the SLS regulations in 2000 encouraged revendorization under 896 by service providers who previously were performing SLS-type services under service codes outside of the SLS regulations. To an unknown extent, vendors who were performing what regional centers considered to be services essentially similar to SLS, under such service codes as 052 (Independent Living Program), 062 (Personal Assistance), 063 (Community Activities Support Services), 605 (Adaptive Skills Trainer), and 635 (Independent Living Specialist), changed vendorization to the SLS codes 894 and 896 in 2000 and after. Some of the apparent growth in SLS from 2000 on may be attributable to this vendor category shifting. Statewide numbers reflect SLA Purchase of Service (POS) expenditures regardless of consumer catchment area movement. Regional center numbers reflect only SLA POS expenditures and consumer numbers that are regional center specific and does not capture total SLA POS expenditures for consumers who received services in more than one catchment area. The sum total number of consumers reported by regional center may slightly exceed the total number of consumers reported on the statewide line due to this variance in data collection. Since costs are reported in arrears, some data variance may occur due to when the data is collected. Data collection occurs within the first quarter of the calendar year; allowing costs reported 6 months after the end of the fiscal year to be represented. Source data POS.

**NOTES:**

This table includes only those consumers who received supported living services SLS under Service Codes 894 and/or 896 for whom Client Development Evaluation Report (CDER) and Purchase of Service (POS) data were available, and who received paid SLS services in both the first and last months of the fiscal year 2008-2009. Because only consumers with CDER information are included in this consumer characteristic table, the total number of consumers and reported costs will not match the corresponding data on the separate statewide report, which includes all SLS consumers. This table also includes consumers who received services in addition to SLS (i.e. transportation, day program, etc.; represented by "Other Services Codes" column). The combination of SLS Service and Other Service codes represents a consumer's SLA. Statewide numbers reflect SLA POS expenditures and consumer numbers regardless of consumer catchment area movement. Regional center numbers reflect only SLA POS expenditures and consumer numbers that are regional center specific and does not capture total SLA POS expenditures for consumers who received services in more than one catchment area.

The sum total number of consumers reported by regional center may slightly exceed the total number of consumers reported on the statewide line due to this variance in data collection. Small discrepancies in dollar amounts are due to rounding calculations. Source data CDER and POS.
