EXECUTIVE SUMMARY

The Department of Developmental Services (DDS) conducted a federal compliance monitoring review of the Targeted Case Management (TCM) and Nursing Home Reform (NHR) programs March 17 - 20, 2008, at Inland Regional Center (IRC). The monitoring team selected 50 consumer records for the TCM review. A sample of ten records was selected from consumers who had previously been referred to IRC for a NHR assessment. The period of review was from January 1, 2007 – December 31, 2007.

Purpose of the Review

Case management services for regional center consumers with developmental disabilities were added as a medical benefit to the Medi-Cal State Plan in 1986 under Title XIX of the Social Security Act. TCM services are those “. . . services which will assist individuals in gaining access to needed medical, social, educational, and other services.” DDS implemented the TCM program statewide on July 1, 1988.

The NHR Pre-Admission Screening/Resident Review (PAS/RR) program involves determining whether an individual in a nursing facility with suspected developmental disabilities is developmentally disabled and requires specialized services.

Overview of the TCM/NHR Compliance Monitoring Protocol

The review criteria for the TCM and NHR programs are derived from federal and state statutes and regulations and the Centers for Medicare & Medicaid Services guidelines relating to the provision of these services.

Findings

Section I – Targeted Case Management

Fifty consumer records, containing 4,911 billed units, were reviewed for three criteria during the period of review. The sample records were 100% in compliance for criterion 1 (TCM service and unit documentation matches the information transmitted to DDS), 91% in compliance for criterion 2 (TCM service documentation is consistent with the definition of TCM service), and 100% in compliance for criterion 3 (TCM service documentation identifies the service coordinator recording the notes and the date of the service).

Section II – Nursing Home Reform

Ten consumer records were reviewed for three criteria. The ten sample records were 100% in compliance for all three criteria.

SECTION I TARGETED CASE MANAGEMENT

Criterion

1. The Targeted Case Management (TCM) service and unit documentation matches information transmitted to the Department of Developmental Services (DDS).

Findings

IRC transmitted 4,911 TCM units to DDS for the 50 sample consumers. Documentation supporting all of these units was found in the sample consumer records.

Recommendations

None.

2. The TCM service documentation billed to DDS is consistent with the definition of TCM service.

Findings

The sample of 50 consumer records contained 4,911 billed TCM units. Of this total, 4,459 (91%) of the units contained descriptions that were consistent with the definition of TCM services. Allowable TCM units are based on services which assist consumers and/or their families to gain access to resources and services; assessment of level of functioning to assist in determining the appropriate care, training, and services to be provided to consumers and/or their families; reviewing and analyzing consumers' medical, social, and psychological evaluations; consulting with other professionals; and developing consumers' individual program plans.

Four hundred fifty-two of the billed TCM units had descriptions of activities that were not consistent with the definition of TCM services, did not support the amount of time claimed or were not sufficient to determine if the activities could be considered case management. Detailed information on these findings and the specific actions required has been sent under separate cover letter.

Recommendation	Regional Center Plan/Response
IRC should ensure that the time spent on the identified activities that are inconsistent with TCM claimable services (sent separately) is reversed.	Claims will be reversed or reduced as indicated on TCM Chart (sent separately.)

3. The TCM documentation identifies the service coordinator recording the notes and the date of the service.

Findings

The TCM documentation in the 50 sample consumer records identified the service coordinator and the date of the service.

Recommendations

None.

SECTION II NURSING HOME REFORM

Criterion

1. There is evidence of dispositions for the Department of Developmental Services' (DDS) Nursing Home Reform (NHR) referrals.

Findings

The ten sample consumer records contained either a Pre-Admission Screening/Resident Review (PAS/RR) Level I document or NHR automated printout.

Recommendations

None.

2. The disposition is reported to DDS.

Findings

The ten sample consumer records contained either a PAS/RR Level II document or written documentation responding to the Level I referral.

Recommendations

None.

3. The regional center submitted a claim for the referral disposition.

Findings

The billing information for the ten sample consumers had been entered into the AS 400 computer system and electronically transmitted to DDS.

Recommendations

None.
