EXECUTIVE SUMMARY

The Department of Developmental Services (DDS) conducted a federal compliance monitoring review of the Targeted Case Management (TCM) and Nursing Home Reform (NHR) programs October 8-9, 2008, at San Andreas Regional Center (SARC).

Purpose of the Review

Case management services for regional center consumers with developmental disabilities were added as a medical benefit to the Medi-Cal State Plan in 1986 under Title XIX of the Social Security Act. TCM services are those “. . . services which will assist individuals in gaining access to needed medical, social, educational, and other services.” DDS implemented the TCM program statewide on July 1, 1988.

The NHR Pre-Admission Screening/Resident Review (PAS/RR) program involves determining whether an individual in a nursing facility with suspected developmental disabilities is developmentally disabled and requires specialized services.

Overview of the TCM/NHR Compliance Monitoring Protocol

The review criteria for the TCM and NHR programs are derived from federal and state statutes and regulations and the Centers for Medicare & Medicaid Services guidelines relating to the provision of these services.

Findings

Section I – Targeted Case Management

Fifty consumer records, containing 2640 billed units, were reviewed for three criteria during the period of review. The sample records were 100% in compliance for criterion 1 (TCM service and unit documentation matches the information transmitted to DDS), 92% in compliance for criterion 2 (TCM service documentation is consistent with the definition of TCM service), and 100% in compliance for criterion 3 (TCM service documentation identifies appropriate SARC personnel who completed the entry).

Section II – Nursing Home Reform

Ten consumer records were reviewed for three criteria. The sample records were 100% in compliance for two criteria. Criteria three was 90% in compliance.

SECTION I TARGETED CASE MANAGEMENT

Criterion

1. The Targeted Case Management (TCM) service and unit documentation matches information transmitted to the Department of Developmental Services (DDS).

Findings

The sample of 50 consumer records contained 2640 billed TCM units. All of the recorded units matched the number of units reported to DDS.

Recommendations

None.

2. The TCM service documentation billed to DDS is consistent with the definition of TCM service.

Allowable TCM units are based on services which assist consumers to gain access to needed social, educational, medical or other services and include the following components: 1) assessment and periodic reassessment to determine service needs; 2) development and periodic revision of an individual program plan (IPP) based on the information collected through the assessment or reassessment; 3) monitoring and follow-up activities, including activities and contacts that are necessary to ensure that the IPP is effectively implemented and adequately addresses the needs of the consumer; and 4) referral and related activities to help the consumer obtain needed services. However, it is important to note that TCM does not include the direct provision of these needed services.

Findings

Of the 2640 billed units, 2440 (92%) units contained descriptions that were consistent with the definition of TCM services. Two hundred of the billed TCM units had descriptions of activities that were not consistent with the definition of TCM services, were not sufficient to determine if the activities could be considered case management, or appeared to be duplicates of other entries. Detailed information on these findings and the specific actions required has been sent under separate cover letter.

Recommendation	Regional Center Plan/Response
SARC should ensure that the time spent on the identified activities that are inconsistent with TCM claimable services (sent separately) is reversed.	SARC has reversed all identified TCM units.

3. The TCM documentation identifies the service coordinator recording the notes and each note is dated.

Findings

The TCM documentation in the 50 sample consumer records identified the service coordinator and the date the note was completed.

Recommendations

None.

SECTION II NURSING HOME REFORM

Criterion

1. There is evidence of dispositions for the Department of Developmental Services' (DDS) Nursing Home Reform (NHR) referrals.

Findings

The ten sample consumer records contained either a Pre-Admission Screening/Resident Review (PAS/RR) Level I document or NHR automated printout.

Recommendation

None.

2. The disposition is reported to DDS.

Findings

The ten sample consumer records contained either a PAS/RR Level II document or written documentation responding to a Level I referral.

Recommendation

None.

3. The regional center submitted a claim for the referral disposition.

Findings

The billing information for nine of the sample consumers has been entered into the AS 400 computer system and electronically transmitted to DDS. The entry for consumer # 9 was not billed.

Recommendation	Regional Center Plan/Response
We recommend that the NHR claim for consumer #9 be entered into the AS400 and electronically transmitted to DDS.	SARC has transmitted billing information to DDS for consumer #9.
