Quality Assessment Project and National Core Indicators

This report contains regional center level results from California's first statewide National Core Indicator (NCI) Child Family Survey from fiscal year (FY) 2012-2013 in accordance with Welfare and Institutions Code (WIC), Section 4571. WIC, Section 4571 directs the Department of Developmental Services (DDS) to collect accurate, reliable, and valid consumer and family satisfaction measures as well as individual outcome data. In California, data from this project will be used to review and benchmark statewide and regional center developmental disability service system performance.¹ This report shows Child Family Survey findings from Inland Regional Center compared to the California statewide average. Regional centers can use this report to help guide strategic planning and monitor systemic changes.

What is NCI?

The National Core Indicators (NCI) program is a voluntary effort by state developmental disability agencies to gauge and track their own performance using a common and nationally validated set of performance measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) in collaboration with the Human Services Research Institute (HSRI). NCI has developed a set of more than 100 standard performance measures (or "indicators") that states use to assess the outcomes of services provided to individuals and their families. These indicators focus on areas such as: employment, rights, service planning, community inclusion, choice, health, and safety. During the FY 12/13 data collection cycle, 33 states and 22 sub-state entities participated in NCI.

What is the NCI Child Family Survey?

The NCI Child Family Survey is a mail-in survey sent to families with children who live in the family home and receive services from the regional center. The NCI Child Family Survey is used to gather data on family outcomes and it is refined and tested to ensure that it is valid and reliable. The survey collects information on the child and respondent's demographics, services and supports received, and contains six groupings of questions that probe specific areas of quality service provision: information and planning, access and delivery of services,

¹ Refer to the California Adult Consumer Survey Report FY 11/12 for detailed information about Quality Assessment Project implementation, the NCI, and California's Statewide results.

choice and control, community connections, satisfaction, and outcomes. Respondents also have the option of writing open-ended comments concerning their family's participation in the service system.

What topics are covered by the survey?

The National Core Indicators are organized by topic or “domain.” Each domain consists of sub-domains, and each sub-domain is associated with a particular area of concern. The NCI Child Family Survey includes items to measure the “Family Outcomes” domain. The table on the following page lists the NCI Family Surveys sub-domains and concerns.

TABLE 1. NCI FAMILY SURVEY INDICATORS – SUB-DOMAINS AND CONCERN STATEMENTS

Sub-Domain	Concern
Information and Planning	Families/family members with disabilities have the information and support necessary to plan for their services and supports.
Access & Support Delivery	Families/family members with disabilities get the services and supports they need.
Choice & Control	Families/family members with disabilities determine the services and supports they receive and the individuals or agencies who provide them.
Community Connections	Family members with disabilities use integrated community services and participate in everyday community activities.
Satisfaction	Families/family members with disabilities receive adequate and satisfactory supports.
Family Outcomes	Individual and family supports make a positive difference in the lives of families.

How were people selected to participate?

For each regional center, DDS selected a random sample of families who had a child with a developmental disability living at home and received at least one direct service or support other than service coordination.²

The State Council on Developmental Disabilities mailed out a paper survey to families selected in their sample. A final sample size of 400 guarantees a +/- 5% margin of error and a 95% confidence level when interpreting the results. Both the confidence interval and margin of error used are widely acceptable for reviewing results, regardless of population size. Some regional centers had a lower than expected return rate and received fewer than 400 surveys; all regional centers reached a minimum threshold of a margin of error no greater than +/- 7%.

Limitations of Data

The NCI Child Family Survey tool is not intended to be used for monitoring individuals or providers, but rather for assessing system-wide performance. The NCI Statewide Average should not be interpreted as necessarily defining “acceptable” levels of performance or satisfaction, nor does it provide benchmarks for acceptable or unacceptable levels of performance for each indicator. Instead, it describes average levels of performance or satisfaction across the state. It is up to public managers, policy-makers, and other stakeholders to decide what is an acceptable or unacceptable result (i.e., percentage of individuals achieving the indicated outcome).

What is contained in this report?

This report illustrates FY 12/13 NCI Child Family Survey demographic and outcome results from Inland Regional Center compared to the CA Average (the average of all regional center averages). All results are shown in chart form along with descriptive text to the right of each outcome chart. Charts do not display the number of respondents to each question. Some questions may have a low response rate, particularly questions about knowledge and use of regional center money, reporting grievances, and abuse or neglect. Regional centers with less than 20 responses to a particular question were excluded from analysis for that question. The number of responses per each question

² Some states include child up to age 22 who are receiving services as a child.

are included in the state report. The state and regional center data results for this survey can be found online at <http://www.dds.ca.gov/DDSHomePage.cfm>.
