I appreciate all of their hard work and continued support of my son during this difficult virus pandemic. They interact with him everyday by phone, checking in to see how he is doing and asking if he needs any further support in any way. They have sent numerous videos that are personalized and specific interests. He is both relaxed and stimulated. This is truly making such a difference in his life. Thank you from the bottom of my heart. --PARENT

You and the staff have gone beyond the call of duty by including us. Our clients enjoy the services. Thank you and your staff for personalizing the remote sessions. What is more interesting that I love about your Community Access Program is you allowed us to include non-CAP clients and they enjoy your services as well. --RESIDENTIAL PROVIDER

Thank you!
