May 4, 2021

TO: REGIONAL CENTER EXECUTIVE DIRECTORS

SUBJECT: Home and Community-Based Services Regulations – Provider Funding Concepts

Background

In response to the January 13, 2021, [letter](#) from the Department of Developmental Services (Department), the Department received 296 total requests for funding from service providers. The purpose of this letter is to inform regional centers of the Department's decisions on these requests and to outline next steps for regional centers to develop a contract with each provider.

The Department reviewed all requests, or funding concepts, submitted by providers. Enclosure One identifies the total number of concepts submitted, and the number approved for funding. Concepts that identified a clear connection between the requested funding and specific federal requirements were considered for initial approval. The Department selected 172 concepts for funding. See Enclosure Two for a list of providers selected within each regional center catchment area.

Each regional center receives a list of the selected concepts for vendors within their catchment area with specific comments and/or recommendations for each concept. A copy of each approved concept will be posted by May 31, 2021, at <https://www.dds.ca.gov/initiatives/cms-hcbs-regulations/hcbs-compliance-funding/>.

“Building Partnerships, Supporting Choices”

Contract developments for Approved Concepts

Regional centers must work with the providers selected for initial approval to develop a contract agreement for implementation. This includes development of a budget that, in total, may not exceed the amount approved by the Department. The costs for each line-item in the budget included in the final contract do not need to match the estimated costs submitted with the concepts so long as the total approved amount is not exceeded. Contracts must be finalized by June 30, 2021. The signed contract must include at a minimum:

- Details regarding the project, including specifics on how the funding will be used to increase compliance with the federal requirements;
- Details regarding how consumer input will be used in the development, implementation, and ongoing monitoring of the project;
- A detailed budget for the project;
- For projects involving the purchase of items or services, a justification (e.g., multiple quotes) of the cost-effectiveness of the purchase;
- A project timeline identifying key milestones related to specific measurable outcomes;
- Specific and measurable objective indicators to show progress toward compliance with the federal requirements;
 - Objective indicators should address how the funds will move the delivery of services toward compliance and address how changes in compliance will be measured. Progress toward compliance should be evaluated by the outcome the allocated funds produce. For example, funding approved for train-the-trainer certification may have interim objectives to obtain the certification and then train other staff once certified, but the outcome and progress should be evaluated based on how the training is being implemented on an individual level, and in what ways the program has changed the provision of services to be more person-centered.
- A requirement for quarterly reporting to the regional center on project implementation, including progress related to key milestones and measurable progress toward compliance with the federal requirements; and,
- A plan for the sustainability of the progress made toward compliance after contract completion.
