Quality Assessment Project and National Core Indicators®

This report contains regional center level results from California's statewide National Core Indicators Family/Guardian Survey data collection from fiscal year 2019-20 in accordance with Welfare and Institutions Code (WIC), Section 4571. WIC, Section 4571 directs the Department of Developmental Services (DDS) to collect accurate, reliable, and valid consumer and family satisfaction measures as well as individual outcome data. In California, data from this project will be used to review and benchmark statewide and regional center developmental disability service system performance.¹ This report shows Family/Guardian Survey findings from Frank D. Lanterman Regional Center (FDLRC) compared to the California statewide and NCI averages. Regional centers can use this report to help guide strategic planning and monitor systemic changes.

What is NCI?

The National Core Indicators (NCI) program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

In 2019-20 a total of 46 states, the District of Columbia and 22 sub-state entities participated in NCI.

What is the NCI Family/Guardian Survey?

The NCI Family/Guardian Survey is used to gather data on family outcomes. It is mailed to families who have an adult family member who does not live with the respondent and receives at least one service other than case management from the state DD agency. The survey collects demographic information on both the individual receiving services ('family member') as well as the person who fills out the survey (the 'respondent') and information on services and supports received. The survey is continually refined and tested to ensure it is valid and reliable.

Important note on responses: All data are reported by the respondent based on their understanding of their family member's demographics, diagnoses, and personal characteristics.

What is included in this report?

This report includes findings from the National Core Indicators®2019-20 Family/Guardian Survey (FGS). All NCI averages are weighted.² This report includes this regional center's Family/Guardian Survey data compared to California and NCI averages.

The charts in this document, grouped by subdomain, display the state results alongside the average across states (NCI average). The charts are followed by accessible tables containing the same information. To find out more about the development of the Family/Guardian Survey, data analysis and state samples, check out the National Family/Guardian Survey:

<https://www.nationalcoreindicators.org/resources/reports/#reports-family-survey-final-reports>.

¹ Refer to the 2019-20 California Family/Guardian Survey Report for information about Quality Assessment Project implementation, NCI, and California's statewide results.

² NCI averages are comprised of 9,435 valid surveys collected across 11 states: AZ, CA, FL, GA, MD, MN, NH, NC, PA, SD, and UT.

Important Note on COVID-19

The 2019-20 NCI Family Survey data collection cycle began July 1, 2019 and ended June 30, 2020. Midway through data collection, in February 2020, COVID-19 began to spread across the United States. Data collection for the NCI Family Surveys continued throughout the pandemic. States began data collection at various times throughout the year – some before the pandemic started and some after. Because the family surveys do not collect information on the date of survey completion, we cannot fully assess what impact the pandemic had on data collected at different times throughout the year. Additionally, we cannot determine whether the onset of COVID-19 impacted state samples. For instance, we do not know if certain populations were more or less likely to respond to the survey after February, and we do not know whether or how responses were affected for specific questions for those who completed the survey after the pandemic began. While these data will serve as an important baseline, and meaningful way for states to understand the overall impact of services on families of individuals being served, these data should be read with caution.

Demographics

Important note on responses: All data are reported by the respondent based on their understanding of their family member's demographics, diagnoses, and personal characteristics.

Demographics of Family Member Receiving Services

This section provides demographic profiles of the family member about whom the survey was completed.

Family/Guardian Survey Results

⁵ Note on Significance: Statistical significance depends on both the amount by which a Regional Center differs from the average for a given item and the Regional Center's sample size for that item. There may be instances where Regional Center A's difference from the average is larger than Regional Center B's, but Regional Center B is shown as significantly different from the average whereas Regional Center A is not. The larger the sample size of a Regional Center, the smaller the difference needs to be for it to be statistically significant.

Information and Planning Charts

Families and family members with disabilities have the information and support necessary to plan for their services and supports.

The following pages contain charts depicting the results. The same data are repeated in the accessible tables that follow.

Do you get enough information to take part in planning services for your family member?

Is information from the regional center offered in your preferred language?

Is the information you get about services and supports easy to understand?

Do staff or the residential agency keep you informed about how your family member is doing?

Does the case manager/service coordinator respect your family's choices and opinions?

Do you need help planning for your family member's future with respect to any of the following?

Do you need help planning for your family member's future with respect to any of the following?
