The Home and Community-Based Services (HCBS) rules supports people with disabilities to have full access to, and enjoy the benefits of, community living through long-term services and supports in the most integrated settings of their choosing. Completion of this concept form is for the sole purpose of applying for compliance funding and does not take the place of provider assessments or remediation that the Department has required to determine provider compliance with the HCBS settings rules.

Prior HCBS funding focused primarily on barriers to compliance with the 10 federal requirements of the HCBS Final Rule. HCBS funding for fiscal year 2021-2022 will still take the 10 federal requirements into account and will also place increased emphasis on the outcome of a provider's concept. To simplify the process, the federal requirements were placed in three categories that target similar outcomes. Those categories are Community Integration, Individual Rights, and Choice. A fourth category, Collaboration, may be used for a concept between multiple providers to develop a community resource or collaborate on a project benefiting multiple settings. The bulleted questions listed under each category are for providers to consider when thinking about their current operations and plans for the future. These questions should be used when considering ways to build a concept that will achieve increased person-centered practices ongoing.

Service providers may request a copy of their completed self-assessment, by contacting their regional center HCBS Program Evaluator. A blank copy of the assessment can be found at https://www.dds.ca.gov/wp-content/uploads/2020/09/CADDSHCBSProviderSelfAssessment.pdf.

More information on the HCBS rules and this form can be found at https://www.dds.ca.gov/initiatives/cms-hcbs-regulations/.

Questions may be directed to hcbs.regs@dds.ca.gov.

Community Integration

How will providers support the following through their services?

- Individuals receiving services in the community based on their needs, preferences and abilities.
- Individuals participating in activities in the community, which are routinely
 accessed by the general public, and are not solely for the purpose of supporting
 people with disabilities, as part of their plan for services.
- Individuals exercising control over their schedules and activities.
- Opportunities for activities in the community that include meaningful interaction
 with individuals not receiving regional center services, not including paid staff or
 volunteers (e.g. development of hobbies or interests, volunteering, job training,
 etc.).
- Access to competitive integrated employment opportunities. Note: information on California's Competitive Integrated Employment Initiative can be found at http://www.chhs.ca.gov/home/cie/

Individual Rights

How will providers support the following through their services?

- Informing individuals, in a manner they can understand, of their rights to privacy, dignity, respect, and freedom from coercion and restraint.
- Communication with individuals based on their needs and preferences, including alternative methods of communication where needed (e.g., assistive technology, Braille, large font print, sign language, participants' language, etc.).
- Individuals have informed consent and regular review regarding residential agreements, admission agreements, or other forms of written residency agreements.
- Individuals taking active roles in program policies and shared house rules.
- Individuals understanding of the balance between the rights they have and respecting the rights of others, building skills of negotiation.
- Individuals' understanding of the different service options available to them, and working towards individualized goals with support.
- Choice regarding roommates or private accommodations.
- Visitors are welcome to visit the home at any time.
- Individuals going with visitors outside the home; such as for a meal or shopping, or for a longer visit outside the home, such as for holidays or weekends.
- Individuals having the freedom to move about inside and outside the home.
- For those requiring accessible supports, grab bars, seats in bathrooms, ramps for wheelchairs, etc., are available so that individuals can move about the setting as they choose.
- Appliances and furniture are accessible to every individual.

Choice

How will providers support the following through their services?

- Offering daily activities based on individual's needs and preferences.
- Structuring support so that individuals are able to interact with people they choose to interact with, both at home and in community settings.
- Structuring support so that individuals are able to participate in activities that interest them and correspond with their IPP goals.
- Supporting individuals in choosing which staff provide their care to the extent that alternative staff are available.
- Opportunities to modify services and/or voice concerns outside of the scheduled review of services (IPP review).
- Individuals having access to food at any time.
- Supporting individuals to set their own daily schedules.

Collaboration

 Does your program excel in a particular facet of your service type that can be beneficial to other programs in coming into compliance and strengthening person-centered practices?

- Does your concept involve at least one additional agency who will share in the development and implementation of the concept?
- Are there increased benefits to people you serve by collaborating on this concept with other providers?
- Are you developing a community of practice? (i.e. a group of people who share a common interest and come together to learn from each other and achieve a common goal.)

Some previously funded concepts have successfully collaborated to assist other providers in enhancing their services through projects such as:

- Development of toolkits and resources regarding the Final Rule, or areas within the Final Rule (employment options, housing, person-centered planning, etc.), that can be broadly accessed.
- Training and knowledge-sharing with others in their catchment area.
- Creation of person-centered planning applications/software.

HCBS Final Rule: List of Federal Requirements

Federal Requirement #1: Access to the Community

The setting is integrated in, and supports full access of individuals receiving Medicaid HCBS to the greater community, including opportunities to seek employment and work in competitive integrated settings, engage in community life, control personal resources, and receive services in the community, to the same degree of access as individuals not receiving Medicaid HCBS.

Federal Requirement #2: Choice of Setting

The setting is selected by the individual from among setting options, including non-disability-specific settings and an option for a private unit in a residential setting. The setting options are identified and documented in the person-centered service plan and are based on the individual's needs, preferences, and, for residential settings, resources available for room and board.

Federal Requirement #3: Right to be Treated Well

Ensures an individual's rights of privacy, dignity and respect, and freedom from coercion and restraint.

Federal Requirement #4: Independence

Optimizes but does not regiment individual initiative, autonomy, and independence in making life choices, including, but not limited to, daily activities, physical environment, and with whom to interact.

Federal Requirement #5: Choice of Services and Supports

Facilitates individual choice regarding services and supports, and who provides them.

For providers who operate a residential setting:

Federal Requirement #6: Residential Agreement

The unit or dwelling is a specific physical place that can be owned, rented or occupied under a legally enforceable agreement by the individual receiving services, and the individual has, at a minimum, the same responsibilities and protections from eviction that tenants have under the landlord/tenant law of the State, county, city or other designated entity. For settings in which landlord/tenant laws do not apply, the State must ensure that a lease, residency agreement or other form of written agreement will be in place for each participant and that the document provides protections that address eviction processes and appeals comparable to those provided under the jurisdiction's landlord/tenant law.

Federal Requirement #7: Privacy

- 1. Each individual has privacy in his/her sleeping or living unit:
- 2. Units have entrance doors lockable by the individual, with only appropriate staff having keys to doors as needed.
- 3. Individuals sharing units have a choice of roommates in that setting.
- 4. Individuals have the freedom to furnish and decorate their sleeping or living units within the lease or other agreement.

Federal Requirement #8: Schedule and Access to Food

Individuals have the freedom and support to control their own schedules and activities, and have access to food at any time.

Federal Requirement #9: Right to Visitors

Individuals are able to have visitors of their choosing at any time.

Federal Requirement #10: Accessibility

The setting is physically accessible to the individual. C

Regional center vendors may receive funding to make changes to service settings and/or programs to enhance current services through individualized service delivery. To be considered for funding, vendors must complete and submit this form to the regional center with which it has primary vendorization.

Instructions:

- The concept form on the next page must be used, may not exceed four pages plus the budget worksheet and any cost backup, and must be kept in Arial 12-point font. Submit the form in Microsoft Word or PDF format. An extra half page is permitted to answer questions about prior funding.
- Using a form from previous years will negatively impact a concept score. Please use the current FY 21-22 form.
- For providers that operate programs with several vendor numbers involved in one concept, one blueprint and concept form should be submitted and should list all vendor numbers for related/included programs. If multiple programs owned by the same parent company have different blueprints or concepts, additional applications can be submitted but should be attached in the same document as the other owned programs so they can be reviewed together.
- The concept includes detailed information that describes the funding requests and supports how the requests will assist the provider in enhancing person-centered service delivery.
- Concepts should demonstrate how the requested change in service delivery will impact individuals in offering more choices and opportunities.

While concept development should be individualized for each provider, some common themes persist among those that have been previously selected for funding.

Strengths of previously funded concepts:

- Identified the need as well as proposed a plan to provide outreach and information regarding the HCBS rules to individuals served and members of their support teams.
- Discussed the need for additional funds to effectively support individuals served on a more individualized basis in overcoming barriers to community integration and employment, as appropriate.
- Prioritized the preferences of individuals served and utilized their feedback in the development of the concept.

Vendor name	GROVE WAY MANOR INC and ANDALUCIA HOME
Vendor number(s)	HB0717, HB1202
Contact Name	MARISSA LEGARDA
Contact Email Address	legarda_marissa@yahoo.com
Primary regional center	REGIONAL CENTER OF THE EAST BAY
Service type(s)	ADULT RESIDENTIAL FACILITY- 4I, 4D
Service code(s)	915
Number of consumers typically and currently served	6, 4
Typical and current staff- to-consumer ratio	1 STAFF : 2 CONSUMERS

1. Please provide a brief description of the service/setting. Include what a typical day consists of during regular program as well as how services are currently being provided. This response must include the baseline/current levels for any aspects of the program for which the concept proposes funding. If you have previously identified your program as compliant with the HCBS Final Rule through the Self-Assessment, what changes have occurred that has changed your level of compliance?

The Home delivers care and services to consumers who are developmentally disable and highly functional. The Home is designed to help consumers maintain and develop their highest independent functioning with a very strong emphasis in providing the most rewards and quality of life possible. The Home will assist consumers in exploring and celebrate cultural diversity, by exposing consumers to activities and events that may enlighten the consumers regarding cultural diversity, like cultural dinner, black history month, Chinese New Year, Cinco de mayo, etc. This program will provide consumers with positive experiences that will nurture their mind; body and spirit as well as provide a safe living environment. The Home encourages consumers to participate in a variety of integrated, age-appropriate activities that takes place in their natural environment. For example, the Home is training money management, we will do training specifically in stores and banks. We will encourage a small group to access these generic resources so they would integrate into the community. The Home encourage consumers involvement with the local community. Prior to pandemic the Home was able to provide these services without limitations, such as providing transportation during van rides and sight-seeing tours. Also, he Home provides transportation for consumers on their hospital and doctor's appointments. Due to the Pandemic the Home struggles in terms of transportation, because of the standard health rules imposed by the CDC such as the implementation of 6 feet social distancing. Not all consumers can come, and some activities were delayed and put on hold and resulting to outing conflicts. In connection to this, activities are frequently compromised beyond the capability of the facility. It is essential for the clients to have a bigger van which is ready for transportation, to support their needs and abide with the current regulation for them to achieve these activities in line with their current Individual Service Plan.

Project Narrative Description: While filling out this section, reflect on how services are typically provided and how that might have changed in the past year. Think about what has been learned in the past year and how that might shape services going forward. Funding awarded through this concept can span the course of up to two years which would allow time to shape services to be more personcentered and align with the HCBS federal requirements.

2. Please provide a brief summary narrative of the concept for which you are requesting funding, including justification for the funding.

The Home enable to meet some HCBS standard criteria in line with this we are requesting funding support. We are providing services to consumers with severe behavioral issues. During this Covid 19 pandemic it is a big challenge to us to meet the need to provide services for our consumers. Due to limited access to outings and van ride sight-seeing tours consumers behavior escalates resulting to damage to some properties in the facility. Having a bigger van were able to provide transportation for our consumers for outing and van ride sight-seeing tours as well as follow CDC guidelines in terms of 6ft social distancing. It will benefit the consumers to be a part of community outing of their choice.

Home would like to request funding for staff trainings for them to be more competent and efficient in providing services for the consumers and for them to provide the quality of life for the consumers. This will be of great help to easily recognize client's needs with holistic approach. It is a great idea and highly important during this Covid 19 pandemic to have an additional room for quarantine purpose to cohort consumer/s who are exposed/positive with Covid 19 or as a sensory room Snoezelen to help consumers to relax, calm and reduce agitation using gentle light, soothing sound, relaxing smells and texture. In line with this we are requesting funding to build an ADU (Accessory Dwelling Unit) with sensory room Snoezelen.

- 3. Identify which category/ categories this concept addresses.
 - [x] Community Integration
 - [x] Individual Rights
 - [x] Choice
 - [x] Collaboration
- 4. Please list the proposed objectives and outcomes of the concept, as well as the methods of achieving and tracking them. How will this concept assist you in reaching goals within the category that you are requesting funds?

The main goal of having bigger van, is for us to fit consumers during outings and van ride sight-seeing tours without compromising the current regulation and guidelines. The Home will maintain the bigger van to ensure the safety of the consumers. The ADU (Accessory Dwelling Unit) with sensory room Snoezelen will give extra space to use for the consumers. It will serve as a cohorting room to consumers who are exposed/positive with Covid 19. At the same time the sensory room Snoezelen will help consumers to relax, develop, stimulate and as a therapy room to relax their mind and set a positive mood outcome. For the staff trainings it will be great help for them to know their consumers more, provide help to the consumers have their physical and emotional

needs met by providing self-care, emotional support, and high quality. care. Also, for staffs to provide an enjoyable and fun environment for the consumers.

5. Please describe how and/or what was done to ensure that individuals served by the program led the development of this concept? Discuss not only the development of the concept, but also what steps were taken to identify the interests and desires of the individuals and who was involved in that process.

The Administrator will consult with each consumer as well as staffs who are primarily involved in providing care. To establish the needs and preferences with regards to federal requirements.

6. Please describe how the concept you propose will enable you to provide more person-centered services to the individuals you serve.

Van ride sight-seeing tours and outings will provide our consumers the opportunity to interact around the community and their peers. ADU (Accessory Dwelling Unit) with sensory room Snoezelen, provides comfort and additional space to the consumers during their free time and while they're doing their activities. Sensory room Snoezelen will help consumers to relax, develop, stimulate and as a therapy room to relax their mind and set a positive mood outcome. For the staff trainings it will be great help for them to know their consumers more, provide help to the consumers have their physical and emotional needs met by providing self-care, emotional support, and high quality. care. Also, for staffs to provide an enjoyable and fun environment for the consumers.

7. What percentage of individuals served by your program will directly benefit from implementation of this concept?

100%. All consumers as well as the staff will directly benefit with this kind of concept proposal to achieve the ultimate goal of the facility.

8. Please address your plan for maintaining the benefits, value, and success of your project at the conclusion of 2021-22 HCBS Funding.

The facility will ensure that this proposal granted funding will implement and continue to utilize to provide our consumers quality of life.

9. Write a brief narrative below explaining each major cost category and timeline. Complete the budget template at the end of the concept sheet. An Excel version with formulas is available. When applicable, budgets should include personnel/benefits, operating costs such as consultants or training, administrative expenses/indirect costs, and capital costs (assets lasting more than 2 years). If project spans 2 years or occurs in phases, budget should be separated by phase/year.

Administrative costs, if any, must comply with DDS' vendor requirements, including a cap of 15% of the sum of personnel/benefits, consulting, and operating costs (must exclude capital costs). This information can be found at this link.

If granted, the facility will use the fund to purchase and build those necessary as soon as possible in order to provide a quality of life and maintaining the standards of the facility.

10. Please address sustainability of funding sources for all programs or concepts requiring any funding past the timeframe of the requested funding, especially those that involve staff or other long-term costs. Please mark "not applicable" if costs will all be incurred during the program timeframe; up to two years.
