

Social Rec Grants

Definition of Key Terms

Community Based Organizations (CBO)

For the purposes of this grant, a CBO is defined as a public or private nonprofit, or private for-profit organization that is representative of and advocates for a community or significant segments of a community.

General population

Persons without an intellectual and developmental disability (I/DD) and who are not directly served by a RC.

Goals

Targets established by the grant applicant for standard outcome measures. Reference Project Types and Standard Outcome Measures (ATTACHMENT G) for project type descriptions, standard outcome measures, data collection suggestions and examples.

Individuals

Persons served by a regional center who have an I/DD.

One-Page Profile

A one-page profile is a document that informs staff and peers about the child or adolescent with I/DD and how to best support during the program activities. A one-page profile typically captures important information about the person in three headings: what people appreciate about the person, what's important to the person, and how to best support the person. Consult your RC to discuss how a one-page profile may be created for the child being supported.

Person Centered Planning (PCP)

PCP helps the person being supported to explore and share what a meaningful life looks like for them and to describe the supports needed to achieve that life. The planning process may include the discovery of various person-centered skills including but not limited to: What is important TO the person? What is important FOR the person; What supports the person needs to have a good balance between important TO and Important FOR; or Good Day/Bad Day.

Consult with the RC Designee to discuss how PCP may be explored. (Resource:

Project Type

The Department has created seven different project types that describe broad categories of grant projects. Descriptions and examples of project types are described in Project Types and Standard Outcome Measures (ATTACHMENT G). Each grant applicant will select one or more of the seven project types that best describe their grant program. Only one Letter of Intent (ATTACHMENT C) is required for grant proposals that include one or multiple project types.

Regional Center Designee

The lead person the RC designates to provide oversight and monitoring of the grant project. RC staff that may provide technical assistance to the grantee. See Regional Center Directory (ATTACHMENT I) for a list of RC designees.

Regional Centers (RCs)

RCs are private nonprofit corporations that contract with the Department to provide or coordinate services and supports for individuals with I/DD. There are 21 RCs in California. See Map of Regional Center System (ATTACHMENT J).

Standard Outcome Measures

Outcome Measures are standard data points used to measure the progress and outcomes of grant projects. Standard outcome measures have been developed for each project type. For more information on outcome measures, see Project Types and Standard Outcome Measures (ATTACHMENT G).
