## ***Message from the California Department of Developmental Services***

Vision: The Department of Developmental Services (DDS) works to ensure Californians with developmental disabilities experience respect for their culture and language preferences, their choices, beliefs, values, needs, and goals, from a person-centered service system made up of a network of community agencies that provide high quality, outcome-based and equitable services.

The NCI Child Family Survey report was compiled by Human Services Research Institute (HSRI) in accordance with Welfare and Institutions Code (WIC), Section 4571. It is an important effort to collect accurate, reliable, and valid individual and family satisfaction measures, as well as individual outcome data. More information about the California NCI can be found at <https://www.dds.ca.gov/rc/nci/>.

This is the fourth administration of the Child Family Survey, with data collected from December 2021 through June 2022. During that time, 5,589 mail-out surveys were completed by family members of a child with intellectual and developmental disabilities receiving at least one service beyond case management from a regional center who live in the same residence. These findings contribute to our understanding of how California's system for providing services to children with intellectual and developmental disabilities is performing. California uses these reports to monitor changes in the system and to guide strategic planning and quality improvement activities.

Regional centers can use the data in a similar fashion at the local level.

This report does not compare California's data to the data of other states, but it does include the NCI average across participating NCI states. This is because California's DDS service system is unique among states. Some of the things that make California's service system unique include:

1. California has longstanding statute that ensures services and supports are provided for eligible persons with intellectual and developmental disabilities.
  2. California's laws mandate intake, evaluation and assessment within 120 days.
  3. California has a broad definition of who is eligible to receive services.
  4. California has mandated services, including case management, with statutory limitations on caseload size.
  5. California's service obligations to the families needing services are, by law, from pre-conception to death.
  6. California's regional centers are autonomous; each center has a local board of directors to best address the unique needs of individuals served in each of the 21 regions.
  7. Individuals served by regional centers or their families can call a team meeting at any time
-

to request a change in service.

Reports like this offer DDS the opportunity to compare the results of the data across the years. System improvements will take time to identify and achieve, but this report provides valuable data and is one more tool in our continuous effort to improve services and supports to individuals with intellectual and developmental disabilities across California.

### ***Acknowledgements***

This report would not be possible if not for the 5,589 families who agreed to offer their time and discuss their lives in order to assist in improving the services of all people with intellectual/developmental disabilities in California.

### ***List of Abbreviations Used in This Report***

AFS - Adult Family Survey

ARCA - Association of Regional Center Agencies

CAC - Consumer Advisory Committee

CA-ODESA - California Online Data Entry Survey Administration

CCF - Community Care Facility

CIP - Core Indicators Project

CFS - Child Family Survey

CMS - Centers for Medicare & Medicaid Services

DDS - Department of Developmental Services

FGS - Family/Guardian Survey

FHA - Family Home Agency

HCBS - Home and Community-Based Services

HSRI - Human Services Research Institute

ICF - Intermediate Care Facility

ILS/SLS - Independent Living Services/Supported Living Services

NASDDDS - National Association of State Directors of Developmental Disabilities Services

NCI - National Core Indicators

QAC - Quality Assessment Coordinator

RC - Regional Center

SCDD - State Council of Developmental Disabilities

---

### ***List of Regional Center Abbreviations***

ACRC- Alta California Regional Center

CVRC- Central Valley Regional Center

RCEB- Regional Center of the East Bay

ELARC- Eastern Los Angeles Regional Center

FNRC- Far Northern Regional Center

FDLRC- Frank D. Lanterman Regional Center

GGRC- Golden Gate Regional Center

HRC- Harbor Regional Center

IRC- Inland Regional Center

KRC- Kern Regional Center

NBRC- North Bay Regional Center

NLACRC- North Los Angeles County Regional Center

RCOC- Regional Center of Orange County

RCRC- Redwood Coast Regional Center

SARC- San Andreas Regional Center

SDRC- San Diego Regional Center

SG/PRC- San Gabriel/Pomona Regional Center

SCLARC- South Central Los Angeles Regional Center

TCRC- Tri-Counties Regional Center

VMRC- Valley Mountain Regional Center

WRC- Westside Regional Center

Workforce (New in 2021-22) .....	66
Table 53. Do support workers come and go when they are supposed to?.....	67
Table 54. Do support workers speak to you in a way you understand? .....	68
Table 55. If your family member does not communicate verbally (for example, uses gestures, sign language, or a communication aid), are there support workers who can communicate with them? .....	69
Table 56. Do support workers have the right information and skills to meet your family's needs?.....	70
Table 57. Do your child's support workers change too often? Is there too much "turnover" of support workers?.....	71
Table 58. Is there always a staff person available to support your family member when support is needed? .....	72
Choice, Decision Making and Control .....	73
Table 59. Can someone in your family choose or change the agency that provides your child's services? .....	74

Table 60. Can your family choose or change your child’s support workers?.....	75
Table 61. Can someone in your family directly manage support staff?.....	76
Table 62. Did you, your child, or someone else in your family choose your child’s case manager/service coordinator?.....	77
Community Connections .....	78
Table 63. Does your child do things in the community?.....	79
Table 64. For your child, what makes it hard to do things in the community? .....	80
Table 65. Does your child spend time with children who do not have developmental disabilities? .....	81
Table 66. In your community, are there resources that your family can use that are not provided by the regional center (for example, recreational programs, community housing, library programs, religious groups, etc.)? .....	82
Table 67. Does your family take part in any family-to-family networks in your community?.....	83
Health, Welfare, and Safety (New in 2021-22) .....	84
Table 68. Can your child see a primary care provider (doctor, registered nurse, etc.) when needed?.....	85
Table 69. Does your child’s primary care doctor understand your child’s needs related to their disability? .....	86
Table 70. Can your child go to the dentist when needed? .....	87
Table 71. Does your child’s dentist understand your child’s needs related to their disability? .....	88
Table 72. If your child takes prescription medications, do you know what they’re for?.....	89
Table 73. Do you, your family member, or someone else in your family know what is needed to safely take the medications (when it should be taken, how much to take, and the potential side effects)? .....	90
Table 74. Can your child get mental or behavioral health supports when needed? (Like see a therapist, go to group counseling). .....	91
Table 75. Does your child’s mental or behavioral health professional understand your child’s needs related to their disability? .....	92
Table 76. If you asked for crisis or emergency services during the past 12 months, were services provided when needed? .....	93
Table 77. Do you feel prepared to handle the needs of your child in an emergency such as a medical emergency, pandemic or natural disaster? .....	94
Table 78. Have you discussed how to handle emergencies (such as a medical emergency, pandemic or natural disaster) with your child’s case manager/service coordinator? .....	95

Table 79. Do you know how to file a complaint or grievance about provider agencies or staff?	96
Table 80. If a complaint or grievance was filed or resolved in the past 12 months, are you satisfied with the way it was handled?	97
Table 81. Do you know how to report abuse or neglect related to your child?	98
Table 82. Within the past 12 months, was a report of abuse or neglect filed on behalf of your child?	99
Table 83. If a report of abuse or neglect was filed on behalf of your child, if someone outside of your family reported abuse or neglect, were you notified of the report in a timely manner?	100
Family Satisfaction	101
Table 84. Overall, are you satisfied with the services and supports your child currently receives?	102
Table 85. Do you feel that services and supports have made a positive difference in the life of your family?	103
Table 86. Have services and supports reduced your family's out-of-pocket expenses for your child's care?	104
Table 87. Do you feel that family supports have improved your ability to care for your child?	105
Table 88. Have services or supports that your child/family received during the past 12 months been reduced, suspended, or terminated?	106
Table 89. If services or supports received by the family were reduced, suspended or terminated during the past year, did the change in services affect child negatively?	107
Table 90. Have the services or supports that your child is receiving been increased in the past 12 months?	108
Table 91. Are services and supports helping your child to live a good life?	109
COVID-19 Supplement	110
Table 92. Were your child's services and supports changed, canceled, or reduced during COVID time?	111
Table 93. If yes, are those changes still in effect (still part of your child's life)?	112
Table 94. If some or all of your child's services have reopened or restarted: Did your family get enough information about the services reopening/restarting?	113
Table 95. If some or all of your child's services have reopened or restarted: Do you feel that service providers are following COVID-19 safety precautions?	114
Table 96. If staff come into your home to support your child: Do you feel that the staff follow recommendations to keep the household safe and healthy?	115

Table 97. Do you feel that the people in your household have the personal protective equipment (PPE) they need to stay healthy and safe when going out in the community?....	116
Table 98. In preparation for the future, have you made or updated an emergency plan with your child's case manager or with other staff? .....	117
California Specific Questions .....	118
Table 99. Total Out-of-Pocket Expenses Related to Family Member's Care in the Past Year	119

# Executive Summary

National Core Indicators—Intellectual and Developmental Disabilities (NCI-IDD) are standard measures used across states to assess the outcomes of services provided to individuals with intellectual or developmental disabilities and their families. Indicators address key areas of concern such as respect and rights, service planning, community inclusion, choice, and health and safety. The data that result from NCI-IDD surveys are often used to inform strategic planning, produce legislative reports, and prioritize quality improvement initiatives. Many states also share the data with stakeholder groups such as Quality Councils and use the stakeholder feedback to help set priorities and establish policy direction.

The National Core Indicators (NCI-IDD) Child Family Survey is administered to families who have a child<sup>1</sup> with an intellectual or developmental disability who lives in the family home and receives at least one service other than case management. Not all states that participate in NCI-IDD administer the Child Family Survey on an annual basis. Of the 48 states, the District of Columbia and 22 sub-state entities that were members of NCI during the 2021-22 data collection cycle, seven states<sup>2</sup> submitted a valid sample of Child Family Survey data. **Please note: the NCI-IDD averages shown throughout this report are weighted.**<sup>3</sup>

In California, the Child Family Survey is administered once every two years and data are collected from all 21 regional centers. The California statewide average is comprised of these data. This report provides a summary of results based on data submitted by June 30, 2022.

***Note:** All Californians with an intellectual or developmental disability as defined by California law have both a civil right and an individual entitlement to receive services from the California Department of Developmental Services. As a result of these requirements, all eligible individuals are enrolled in California's service system, and California establishes no waiting list for services. This impacts comparability between California NCI survey results and the NCI survey results of other states.*

---

<sup>1</sup> Some states include people up to 21 years old receiving child services

<sup>2</sup> Alaska (AK), California (CA), Indiana (IN), Louisiana (LA), Missouri (MO), Oregon (OR), and Wisconsin (WI)

<sup>3</sup> For more information see “Weighting” in the Methodology section

## *Note on the Impact of COVID-19*

The national 2021-22 NCI-IDD Family Survey data collection cycle began July 1, 2021<sup>4</sup> and ended June 30, 2022; California began data collection in December 2021. As COVID-19 variants continued to impact communities across the United States, states were impacted in various ways throughout the year. Because the family surveys do not collect information on the date of survey completion, these data cannot fully assess what impact the pandemic had on data collected at different times throughout the year. While these data will serve as an important baseline, and meaningful way for states to understand the overall impact of services on families of individuals being served, these data should be read with caution.

To help better understand the overall impact of COVID-19 on families, NCI-IDD added a state-optional COVID-19 Supplement to all NCI-IDD Surveys. The COVID-19 Supplement is intended to support the understanding of the experience of people with disabilities and their families at the beginning of the COVID-19 pandemic, and their interactions with services during that time. Last year's Family Survey COVID-19 Supplement can be found [here](#).

---

<sup>4</sup> CA began data collection December 2021

**Respondents** of this survey are families of children (3-17 years old) who have IDD and who live with them and receive at least one service in addition to case management from the state DD service system. # I. Results

*This section provides regional center, California, and NCI-IDD results for demographic and survey outcomes data.*

# Presentation of Data

In addition to basic demographic questions and questions on services received, the survey contains six groupings of questions that probe specific areas of quality service provision: information and planning, access and delivery of services, choice and control, community connections, satisfaction, and outcomes. Each question is constructed so the respondent selects from either four possible responses ("always," "usually," "sometimes," "seldom/never") or two responses ("yes" or "no"). Respondents also have the option to indicate that they don't know the answer to a question or that the question is not applicable.

Demographic results are shown in table form with regional centers listed alphabetically. Outcomes are shown first with a chart depicting the CA average. The charts are followed by accessible tables showing regional center outcomes listed alphabetically.

Regional centers with fewer than 20 respondents to a question **are not** included in outcome tables; however, their data **are** included in the CA average. Twenty (20) surveys were received from unknown regional centers. Data from those surveys are included in the CA average.

**Note on NCI Averages:** The NCI-IDD averages contained in this report are “weighted” means; their calculations reflect the relative population sizes of participating states and the states’ sample sizes. See more about weighting in the Methodology section.

**Note on language used in this report:** “**You**” and “**Respondent**” refers to the person (usually a parent or guardian) filling out the survey. “**Child**” refers to the person receiving services whom the respondent is answering questions about in this survey.

**Note on responses:** All data are reported by the respondent based on their understanding of their family member’s demographics, diagnoses, and personal characteristics.

# Demographics

**Note on responses:** All data are reported by the respondent based on their understanding of their family member's demographics, diagnoses, and personal characteristics.

## *Child*

*This section provides demographic information about the child receiving services.*

## *Respondents*

*This section provides demographic information about the respondent.*

**Table 11a. Language Usually Spoken at Home**

The standard NCI-IDD Child Family Survey tool includes: English, Spanish, Chinese (including Mandarin, Cantonese, and Hokkien) Tagalog (including Filipino), Vietnamese, American Sign Language (ASL), and Other. California adds additional language categories to their survey tool; the NCI-IDD Average for “Other” captures the additional languages in the standard tool.

# Child Family Survey Results

## *Information and Planning*

*Families have the information and support needed to take part in planning supports and services for their family member receiving services and supports from the state developmental disabilities system.*

**“You”** and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

**“Child”** refers to the child receiving services whom the respondent is answering questions about in this survey.

Table 23. Do you get enough information to take part in planning services for your child?

## *Access and Delivery of Services and Supports*

*Families receive services and supports that are appropriate to the needs of the family and the family member receiving services and supports from the state developmental disabilities system.*

**“You”** and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

**“Child”** refers to the child services whom the respondent is answering questions about in this survey.

## *Workforce (New in 2021-22)*

*There is stable and sufficient workforce to meet demand. People are supported by staff who demonstrate respect for what is important to the person in their day-to-day life. Staff have the right skills to support people.*

**“You”** and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

**“Child”** refers to the child receiving services whom the respondent is answering questions about in this survey.

## *Choice, Decision Making and Control*

*Families and family members with disabilities determine the services and supports they receive and the individuals or agencies who provide them.*

**“You”** and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

**“Child”** refers to the child receiving services whom the respondent is answering questions about in this survey.

Can someone in your family choose or change the agency that provides your child's services?

## Community Connections

*Family members receiving services and supports from the state developmental disabilities system are meaningfully engaged as members of their communities and have strong relationships. Families can use supports in their community.*

**“You”** and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

**“Child”** refers to the child receiving services whom the respondent is answering questions about in this survey.

**Table 63. Does your child do things in the community?**

## *Family Satisfaction*

*Services and supports lead to better lives for people with disabilities and their families.*

**“You”** and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

**“Child”** refers to the child receiving services whom the respondent is answering questions about in this survey.

Overall, are you satisfied with the services and supports your child currently receives?

Table 84. Overall, are you satisfied with the services and supports your child currently receives?

## II. NCI History and Activities

*This section briefly describes the history of the National Core Indicators and NCI surveys.*

# Overview of National Core Indicators—Intellectual and Developmental Disabilities

In December 1996, the National Association of State Directors of Developmental Disabilities Services (NASDDDS), in collaboration with the Human Services Research Institute (HSRI), launched the Core Indicators Project (CIP). The aim of the project was to support state developmental disabilities authorities in the development and implementation of performance and outcome indicators—and related data collection strategies—so that they could measure service delivery system performance. This effort, now called National Core Indicators-Intellectual and Developmental Disabilities (NCI-IDD), strives to provide states with valid and reliable tools to help improve system performance and better serve people with intellectual and developmental disabilities and their families. Moreover, NASDDDS' active sponsorship of NCI-IDD facilitates pooled knowledge, expertise, and resources among the states.

In 1997, 15 states convened to discuss the scope and content of a potential performance measurement framework. Directors and staff from these 15 states worked to identify the major domains and sub-domains of performance, indicators, measures, and data sources. The original 61 indicators, developed through a consensus process, were intended to provide a system-level “snapshot” of how well each state was performing. The states were guided by a set of criteria that was designed to select indicators that were:

1. Measurable
2. Related to issues the states had some ability to influence
3. Important to all individuals they served, regardless of level of disability or residential setting

During this initial phase, data collection protocols were developed and field-tested, including a face-to-face Adult In-Person Survey (for individuals age 18 and older who were receiving services) and a mail-out Adult Family Survey (for families who have an adult family member living at home). Seven states volunteered to pilot test the indicators. Eight additional states served on the Steering Committee.

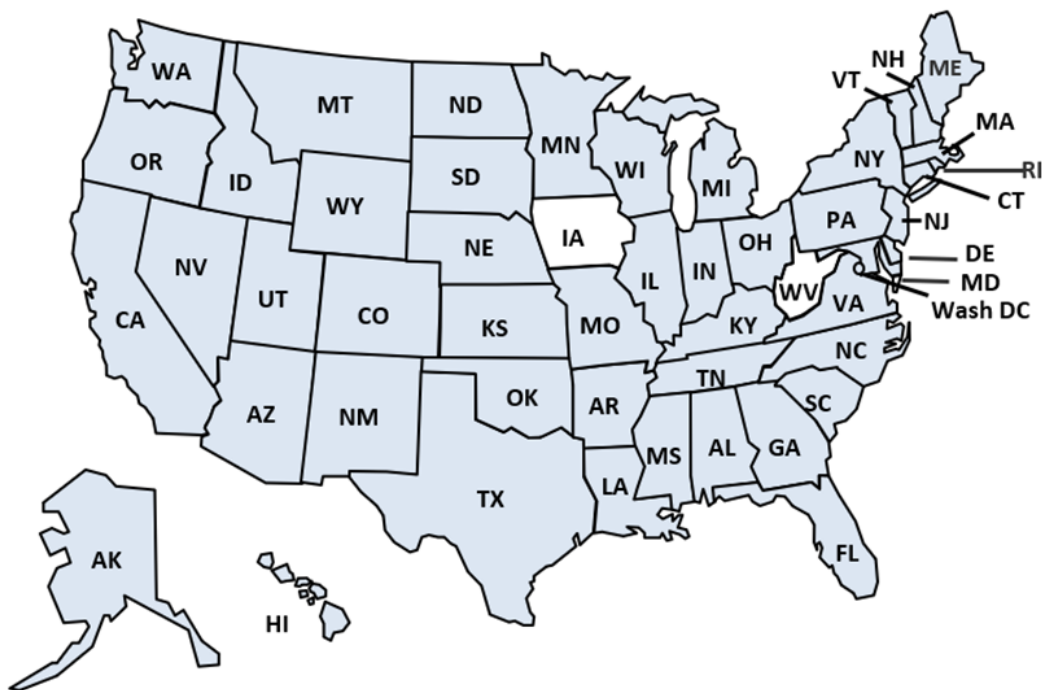

Since the initial field test, NCI-IDD has expanded its scope to include outcomes of services for children with intellectual and developmental disabilities and their families. In addition, NCI-IDD continues to develop and refine the indicators and expand state participation. For more

information about NCI-IDD states, technical reports, and other resources please visit the NCI-IDD website at <https://idd.nationalcoreindicators.org/>.

## State Participation

During the 2021-22 data collection cycle, 48 states, the District of Columbia and 22 sub-state entities participated in NCI-IDD. State participation is entirely voluntary, and participating states are highlighted on the map below. Not all states participate in all surveys each year.

Figure 1. NCI State Participation 2021-22

## The Core Indicators

The Core Indicators are the standard measures used across states to assess the outcomes of services provided to individuals and families. Indicators address key areas of concern, including employment, respect/rights, service planning, community inclusion, choice, and health and safety. An example of a Core Indicator would be, “The proportion of people who have a paid job in the community.” To see the entire list of Core Indicators, please visit the Indicators page on the NCI-IDD website at <https://www.nationalcoreindicators.org/indicators>.

Each survey instrument is designed to measure certain Core Indicators. While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example,

the indicator that measures Community Inclusion (the proportion of people who regularly participate in everyday integrated activities in their communities) is measured by several survey questions that ask about several separate community activities.

The current set of performance indicators includes approximately 100 individual, family, system, and health and safety outcomes—outcomes that are important to understanding the overall health of public developmental disabilities agencies. Indicators are organized across five broad domains: Individual Outcomes; Health, Welfare, and Rights; Staff Stability and Competency; Family Outcomes; and System Performance. Each domain is broken down into sub-domains, as shown in the following table. Four data sources are used to assess outcomes: the Adult In-Person Survey, three Family Surveys, a Staff Stability Survey (e.g., staff turnover), and system data from state administrative records (e.g., mortality rates).

The indicators have remained generally consistent over the last several years and thus can be used to analyze system-level trends over time. However, the NCI-IDD program is a dynamic effort that allows for measures to be added, dropped, or changed to reflect current and future priorities of participating states.

The data collection tools used to gather indicator data are regularly refined and tested to ensure they remain valid, reliable, and applicable to current issues within the field. Details on the design and testing of this tool are provided in the next section of this report.

**Sub-Domains and Concern Statements**

The following table lists the sub-domains under the “Family Outcomes” domain.

**Figure 2. Family Survey Sub-Domains and Concern Statements**

Sub-Domain	Concern Statement
<b>Information and Planning</b>	Families have the information and support needed to take part in planning supports and services for their family member receiving services and supports from the state DD system.
<b>Access &amp; Support Delivery</b>	Families receive services and supports that are appropriate to the needs of the family and the family member receiving services and supports from the state DD system.
<b>Workforce</b>	There is stable and sufficient workforce to meet demand. People are supported by staff who demonstrate respect for what is important to the person in their day-to-day life. Staff have the right skills to support people.
<b>Choice &amp; Decision-making</b>	Families and their family members receiving services and supports from the state DD system are involved in making choices about supports, services, and providers.
<b>Community Connections</b>	Family members receiving services and supports from the state DD system are meaningfully engaged as members of their communities and have strong relationships. Families can use supports in their community.
<b>Health, Welfare, And Safety</b>	Families are supported to ensure the health, welfare, and safety of their family member receiving services and supports from the state DD system.
<b>Satisfaction</b>	Services and supports lead to better lives for people with disabilities and their families.

## *How NCI-IDD Data Are Used*

The Core Indicators provide information for quality management and are intended to be used in conjunction with other state data sources, such as risk management information, regional level performance data, results of provider monitoring processes, and administrative information gathered at the individual service coordination level. States typically use the indicator data to inform strategic planning, produce legislative reports, and prioritize quality improvement initiatives. Some states use NCI-IDD as a data source for supplemental performance measures in their home and community-based services (HCBS) waiver quality management systems and include the information in support of evidentiary reports to the Centers for Medicare & Medicaid Services (CMS). Many states share the indicator data with stakeholder groups such as Quality Councils and use the stakeholder feedback to help set priorities and establish policy direction. It is also important to note that states do not use the information in a punitive way to sanction service providers, nor do they use the results to remediate individual issues (unless specifically requested by the participant or required by law as in the case of suspected abuse, neglect, or mistreatment).

For more information on how to use these data for quality improvement, please see this handbook: [Using National Core Indicators for Quality Improvement Initiatives](#).<sup>9</sup>

### Caution and Limitations

This report does not provide benchmarks for acceptable or unacceptable levels of performance. Rather, it is up to each state to decide whether its score or percentage is an acceptable performance level. Moreover, the NCI-IDD Average should not be interpreted as defining “acceptable” levels of performance or satisfaction. Instead, it represents a multi-state “norm” that describes average levels of performance or satisfaction across the participating states.

In some instances, there are few significant differences among regional centers; this denotes that the majority of states and regional centers are performing similarly. Instances in which several regional center results are especially high (considerably above the average level) indicate the levels of performance or satisfaction achieved in those regional centers might define a level of performance that may serve as a guidepost for other states.

Data from previous years are not presented in this report. Comparisons of results from year to year should be made with caution: even slight changes in wording or response options of certain questions may affect comparability of results from one year to the next; the mix of participating states differs slightly each year and may affect the NCI-IDD Averages; and states and regional centers draw new samples each year rather than following the same group of individuals.

---

## III. Methodology

*This section describes the protocol used by states to select families to participate in the survey, administer the survey, and convey the resulting data for analysis. It also includes information on the statistical methods used by NCI staff to aggregate and analyze the data.*

# Sampling & Administration

States were asked to administer the Child Family Survey by selecting a random sample of at least 1,000 families who:

1. Had a child<sup>10</sup> with an intellectual or developmental disability living in the home; and
2. The child with an intellectual or developmental disability living in the home received at least one direct service or support other than service coordination.

California selects a random sample of at least 2,000 families per regional center. California has chosen to enhance data collection by focusing on obtaining a sample from each RC that has proportionate representation from five ethno-racial groups (i.e., African American/Black, Asian, Hispanic, White and Other). <sup>11</sup>

Beginning in 2016-17, states had a choice of mailing paper surveys to families selected in their sample, sending a URL link for families to complete surveys online (referred to as “direct entry”), or a combination of both modes. Prior to that, states only had the option to mail paper surveys. All states (AK, CA, IN, LA, MO, OR, WI) had at least a portion of surveys completed via direct entry for the 2021-22 data collection cycle.

## Weighting

Statistically, the term “average” refers to a calculated central or middle value of a set of numbers. In NCI-IDD reports, we use the “NCI-IDD average” to demonstrate the typical performance of all the states that conducted the survey. Prior to the 2016-17 survey cycle, the NCI-IDD average was calculated as the simple arithmetic mean of all state means (an approach known as “average of averages”). The approach has since been enhanced to consider the relative numbers of people receiving services through participating states’ systems. The NCI-IDD averages contained in this report are “weighted” means; their calculations reflect the relative population sizes of participating states and the sample sizes.

Applying statistical weights allows a state that provides services to a larger number of people (but is represented in the data by a sample of the same size as other states) to have a higher influence on the overall NCI-IDD average—that is, the state’s contribution to the NCI-IDD average is proportional to its service population. The weights used in calculations for this report were

---

<sup>10</sup> Some states include people up to age 21 who were receiving child services

<sup>11</sup> See “Response Rates” for information on total surveys mailed and received by regional centers as well as each regional center’s margin of error.

developed using each participating state’s number of survey respondents and its total survey-eligible population.

## *Data Entry and Analysis*

Each state entered its survey responses into the Online Data Entry Survey Application (ODESA). All raw data files were reviewed for completeness, invalid responses were eliminated, and quality checks were performed. The data files were then cleaned and merged to create the national dataset.

Data were considered invalid, and therefore excluded, based on the following two criteria:

1. The respondent indicated the individual with an intellectual or developmental disability receiving services lived outside of the family home.
2. Demographic information was entered into the file, but no survey questions were answered.

## *Response Rates*

During 2021-22, seven states, including California, administered the Child Family Survey and submitted a valid sample size for comparison—a sample that would yield a 95% confidence level with +/- 7% (7.49% or less) margin of error; their data are included in the NCI-IDD Averages in this report.

The following table shows response rates for California regional centers and across NCI-IDD states.

Figure 3. Child Family Survey: Regional Center Response Rates

CA <sup>13</sup>	86,852	39,967	5,589	14%	1.27%	72.1%	27.9%
NCI-IDD States <sup>14</sup>	126,624	--	7,902	15.2%	--	66%	34%

<sup>12</sup> State response rates are calculated as following: the number of complete surveys divided by total surveys sent in that state (type "RR1" as defined by the American Association for Public Opinion Research). For more details on the definition, please see the AAPOR report: [https://www.aapor.org/AAPOR\\_Main/media/publications/Standard-Definitions20169theditionfinal.pdf](https://www.aapor.org/AAPOR_Main/media/publications/Standard-Definitions20169theditionfinal.pdf)

<sup>13</sup> CA total include 20 surveys from unknown regional centers.

<sup>14</sup> Includes California; consistent with past years, the overall response rate and margin of error were calculated as the average of state averages, and the overall paper submission and direct entry submission rates were calculated as averages weighted by state total service population sizes (column 2 of this table).
