Quality Assessment Project and National Core Indicators®

This report contains regional center level results from California’s statewide National Core Indicators Family/Guardian Survey data collection from fiscal year 2021-22 in accordance with Welfare and Institutions Code (WIC), Section 4571. WIC, Section 4571 directs the Department of Developmental Services (DDS) to collect accurate, reliable, and valid consumer and family satisfaction measures as well as individual outcome data. In California, data from this project will be used to review and benchmark statewide and regional center developmental disability service system performance¹. Regional centers can use this report to help guide strategic planning and monitor systemic changes.

What is NCI®–IDD?

The National Core Indicators® – Intellectual and Developmental Disabilities (NCI®-IDD) is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

In 2021-22, a total of 48 states, the District of Columbia and 22 sub-state entities participated in NCI-IDD.

What is the NCI-IDD Family/Guardian Survey?

The NCI-IDD Family/Guardian Survey is used to gather data on family outcomes. It is mailed to families or guardians who have an adult family member who does not live with the respondent and receives at least one service in addition to case management from the Regional Center². The survey collects demographic information on both the individual receiving services (‘family member’) as well as the person who fills out the survey (the ‘respondent’) and information on services and supports received. The survey is continually refined and tested to ensure it is valid and reliable.

¹ Refer to the California Statewide Family/Guardian Survey Report FY 21/22 for information about Quality Assessment Project implementation, NCI and California’s statewide results.

² NCI Averages include states that provide services through a central IDD Agency

Please note that while the term “case manager” is used throughout this report, the same role may also be referred to as “service coordinator” or “supports coordinator” depending on the state.

Important note on responses: All data are reported by the respondent based on their understanding of their family member’s demographics, diagnoses, and personal characteristics.

Note: All Californians with an intellectual or developmental disability as defined by California law have both a civil right and an individual entitlement to receive services from the California Department of Developmental Services. As a result of these requirements, all eligible individuals are enrolled in California’s service system, and California establishes no waiting list for services. This impacts comparability between California NCI-IDD survey results and the NCI-IDD survey results of other states.

Important note on Impact of COVID-19

The 2021-22 NCI-IDD Family/Guardian Survey (FGS) data collection cycle began July 1, 2021 and ended June 30, 2022. California began data collection Dec 2021. As COVID-19 variants continued to impact communities across the United States, states were impacted in various ways throughout the year. Because the surveys do not collect information on the date of survey completion, these data cannot fully assess what impact the pandemic had on data collected at different times throughout the year. While these data will serve as an important baseline, and meaningful way for states to understand the overall impact of services on families of individuals being served, these data should be read with caution. To help better understand the overall impact of COVID-19 on families, NCI-IDD added a state optional COVID-19 Supplement to all NCI-IDD Surveys. The COVID-19 Supplement is intended to support the understanding of the experience of people with intellectual/developmental disabilities and their families at the beginning of the COVID-19 pandemic, and their interactions with services during that time. Last year’s Family/Guardian Survey COVID-19 Supplement can be found [here](#).

What is included in this report?

This report includes this regional center’s Family/Guardian Survey data compared to the CA Statewide, and NCI-IDD Average.

The charts in this document, grouped by subdomain, display the state results alongside the average across states (NCI- IDD average). The charts are followed by accessible tables containing the same information.

If there are fewer than 20 respondents to a question, the data are shown as “n/a”, however, data are included in the statewide average.

This report also contains questions that California specifically requested be added. These questions are noted as “CA specific question” and for which there is no NCI-IDD comparison data. For those questions, the NCI-IDD Average is reported as “n/a”.

Demographics

Demographics of Family Member Receiving Services

This section provides demographic information about the respondent.

Important note on responses: All data are reported by the respondent based on their understanding of their family member's demographics, diagnoses and personal characteristics.
