Important notice from the Department of Developmental Services about:
Targeted Case Management Rate Study

Targeted Case Management Time Study

D-2025-Reporting Requirements-002

What to Know

TCM stands for Targeted Case Management. Every three years regional centers must complete the TCM Time Study. The TCM Time Study is based on regional centers' costs of providing case management services to all individuals. The data from this study is used as a factor for adjusting federal funding provided to regional centers. This year's TCM Time Study is to be completed during September 2025.

Questions?

Regional center questions should be directed to Waiver and State Plan Amendment Administration at Federal.Programs@dds.ca.gov.
