EXECUTIVE SUMMARY

The Department of Developmental Services (DDS) conducted a federal compliance monitoring review of the Targeted Case Management (TCM) and Nursing Home Reform (NHR) programs from February 26 through March 15, 2024 at Tri-Counties Regional Center (TCRC). The monitoring team selected 50 records of individuals served for the TCM review for the review period of November 1, 2022, through October 31, 2023. A sample of 10 records was selected from individuals who had previously been referred to TCRC for an NHR assessment.

Purpose of the Review

Case management services for individuals served at the regional center who have developmental disabilities were added as a medical benefit to the Medi-Cal State Plan in 1986 under Title XIX of the Social Security Act. TCM services are those "...services which will assist individuals in gaining access to needed medical, social, educational, and other services." DDS implemented the TCM program statewide on July 1, 1988.

The NHR Pre-Admission Screening/Resident Review program involves determining whether an individual in a nursing facility with suspected developmental disabilities, has a developmental disability and requires specialized services.

Overview of the TCM/NHR Compliance Monitoring Protocol

The review criteria for the TCM and NHR programs are derived from federal and state statutes and regulations and the Centers for Medicare & Medicaid Services' guidelines relating to the provision of these services.

Findings

Section I – Targeted Case Management

Fifty records of individuals served, containing 3,030 billed units, were reviewed for three criteria. The sample records were 100 percent in compliance for criterion 1 (TCM service and unit documentation matches the information transmitted to DDS), 99 percent in compliance for criterion 2 (TCM service documentation is consistent with the definition of TCM service), and 100 percent in compliance for criterion 3 (TCM service documentation identifies the individual who wrote the note and the date the note was completed).

Section II – Nursing Home Reform

Ten records of individuals served were reviewed for three criteria. The 10 sample records were 100 percent in compliance for all three criteria.

SECTION I TARGETED CASE MANAGEMENT

Criterion

1. The Targeted Case Management (TCM) service and unit documentation matches information transmitted to the Department of Developmental Services (DDS).

Finding

TCRC transmitted 3,030 TCM units to DDS for the 50 sample records of individuals served. All of the recorded units matched the number of units reported to DDS.

Recommendation

None

2. The TCM service documentation billed to DDS is consistent with the definition of TCM service.

Allowable TCM units are based on services which assist individuals served to gain access to needed social, educational, medical or other services and include the following components: 1) assessment and periodic reassessment to determine service needs; 2) development and periodic revision of an individual program plan (IPP) based on the information collected through the assessment or reassessment; 3) monitoring and follow-up activities, including activities and contacts that are necessary to ensure that the IPP is effectively implemented and adequately addresses the needs of the individual; and 4) referral and related activities to help the individual obtain needed services. However, it is important to note that TCM does not include the direct provision of these needed services.

Findings

The sample of 50 records of individuals served contained 3,030 billed TCM units. Of this total, 3,025 (99 percent) of the units contained descriptions that were consistent with the definition of TCM services.

Recommendation	Regional Center Plan/Response
TCRC should ensure that the time spent on the identified activities that are inconsistent with TCM claimable services (sent separately) is reversed.	TCRC will ensure that the time spent on the identified activities that are inconsistent with TCM services are reversed. To be completed by 6/30/2024.

3. The TCM documentation identifies the service coordinator recording the notes and each note is dated.

Finding

The TCM documentation in the 50 sample records of individuals served identified the service coordinator who wrote the note and the date the service was completed.

Recommendation

None

SECTION II NURSING HOME REFORM

Criterion

1. There is evidence of dispositions for the Department of Developmental Services' (DDS) Nursing Home Reform (NHR) referrals.

Finding

The 10 sample records of individuals served contained a copy of the Pre-Admission Screening/Resident Review (PAS/RR) Level I form, or NHR automated printout.

Recommendation

None

2. The disposition is reported to DDS.

Finding

The 10 sample records of individuals served contained a PAS/RR Level II document or written documentation responding to the Level I referral.

Recommendation

None

3. The regional center submitted a claim for the referral disposition.

Finding

The billing information for the 10 sample of individuals served had been entered into the AS 400 computer system and electronically transmitted to DDS.

Recommendation

None
