Message from the California Department of Developmental Services

Mission: The Department of Developmental Services (DDS) works to ensure Californians with developmental disabilities have the opportunity to make choices and lead independent, productive lives as members of their communities in the least restrictive settings.

The NCI Family/Guardian Survey report was compiled by Human Services Research Institute (HSRI) in accordance with Welfare and Institutions Code (WIC), Section 4571. It is an important effort to collect accurate, reliable, and valid individual and family satisfaction measures, as well as individual outcome data. More information about the California NCI can be found at <http://www.dds.ca.gov/QA/>.

This is the fourth administration of the Family/Guardian Survey, with data collected from July 2019 through June 2020. During that time, 5,317 mail-out surveys were completed by family members and guardians of an adult with intellectual and developmental disabilities receiving at least one service beyond case management from a regional center who do not live in the same residence. These findings contribute to our understanding of how California's system for providing services to adults with intellectual and developmental disabilities is performing. California uses these reports to monitor changes in the system and to guide strategic planning and quality improvement activities. Regional centers can use the data in a similar fashion at the local level.

This report does not compare California's data to the data of other states, but it does include the NCI Average across participating NCI states. This is because California's DDS service system is unique among states. Some of the things that make California's service system unique include:

1. California has longstanding statute that ensures services and supports are provided for eligible persons with intellectual and developmental disabilities.
2. California's laws mandate intake, evaluation and assessment within 120 days.
3. California has a broad definition of who is eligible to receive services.
4. California has mandated services, including case management, with statutory limitations on caseload size.
5. California's service obligations to the families needing services are, by law, from pre-conception to death.

6. California's regional centers are, by design, autonomous; each center has a local board of directors to best address the unique needs of individuals served in each of the 21 regions.
7. Individuals served by regional centers or their families can call a team meeting at any time to request a change in service.

Reports like this offer DDS the opportunity to compare the results of the data across the years. System improvements will take time to identify and achieve, but this report provides valuable data and is one more tool in our continuous effort to improve services and supports to individuals with intellectual and developmental disabilities across California.

Acknowledgements

This report would not be possible if not for the 5,317 families and guardian who agreed to offer their time and discuss their lives in order to assist in improving the services of all people with intellectual and developmental disabilities in California.

List of Abbreviations Used in This Report

AFS - Adult Family Survey

ARCA - Association of Regional Center Agencies

CAC - Consumer Advisory Committee

CA-ODESA - California Online Data Entry Survey Administration

CCF - Community Care Facility

CIP - Core Indicators Project

CFS - Child Family Survey

CMS - Centers for Medicare & Medicaid Services

DDS - Department of Developmental Services

FGS - Family/Guardian Survey

FHA - Family Home Agency

HCBS – Home and Community-Based Services

HSRI - Human Services Research Institute

ICF - Intermediate Care Facility

ILS/SLS - Independent Living Services/Supported Living Services

NASDDDS - National Association of State Directors of Developmental Disabilities Services

NCI - National Core Indicators

QAC - Quality Assessment Coordinator

RC - Regional Center

SCDD - State Council on Developmental Disabilities

List of Regional Center Abbreviations

Table Q30. Does your family member's case manager/service coordinator support you in a way that is respectful of your culture?.....	86
Table Q31. If your family member does not communicate verbally (for example, uses gestures or sign language, or a communication aid), are there support workers who can communicate with him/her?	87
Table Q32. Do support workers have the right information and skills to meet your family's needs?.....	88
Table Q33. Does your family member have the special equipment or accommodations that s/he needs?	89
Table Q34. Can your family member see health professionals when needed (for example, doctor, dentist, psychologist)?.....	90
Table Q35. Does your family member's primary care doctor understand your family member's needs related to his/her disability?.....	91
Table Q36. Can your family member go to the dentist when needed?.....	92
Table Q37. Does your family member's dentist understand your family member's needs related to his/her disability?	93
Table Q38. If your family member takes medications, do you know what they're for?	94
Table Q39. Do you, your family member, or someone else in your family know what is needed to safely take the medications (when it should be taken, how much to take, and the potential side effects)?	95
Table Q40. If your family member uses mental health services, does the mental health professional understand your family member's needs related to his/her disability?.....	96
Table Q41. Does your family get the supports and services it needs?	97
Table Q42. If your family does not get the support and services needed, what additional services does your family need?	98

Choice, Decision Making and Control..... 99

Table Q43. Does the agency providing residential services to your family member involve him/her in important decisions?	100
Table Q44. Can your family choose or change the agency that provides your family member's services?.....	101
Table Q45. Can your family choose or change the individual staff that provide the services for your family member?	102
Table Q46. Does your family directly manage support staff?	103
Table Q47. Do service providers for your family member work together to provide support?.....	104
Table Q48. Did you, your family member, or someone else in your family choose your family member's case manager/service coordinator?	105

Involvement in the Community..... 106

Table Q49. Does your family member take part in activities in the community?	107
Table Q50. For your family member, what makes it hard to take part in activities in the community?.....	108
Table Q51. Does your family member have friends other than paid support workers or family?.....	109
Table Q52. In your community, are there resources that your family can use that are not provided by the regional center (for example, recreational programs, community housing, library programs, religious groups, etc.)?.....	110
Table Q53. Does your family take part in any family-to-family networks in your community (for example, Parent to Parent, sibling networks, etc.)?	111
Satisfaction With Services and Supports	112
Table Q54. Overall, are you satisfied with the services and supports your family member currently receives?	113
Table Q55. Do you know how to file a complaint or grievance about provider agencies or staff?	114
Table Q56. If a complaint or grievance was filed or resolved in the past year, are you satisfied with the way it was handled?	115
Table Q57. Do you know how to report abuse or neglect related to your family member?	116
Table Q58. Within the past year, was a report of abuse or neglect filed on behalf of your family member?	117
Table Q59. If a report of abuse or neglect was filed on behalf of your family member in the past year, did the appropriate people respond to the report?	118
Table Q60. If someone outside of your family reported abuse or neglect on behalf of your family member in the past year, were you notified of the report in a timely manner?.....	119
Table Q61. Do you feel that services and supports have made a positive difference in the life of your family member?	120
Table Q62. Have the services or supports that your family member received during the past year been reduced, suspended, or terminated?	121
Table Q63. If services or supports received by the family were reduced, suspended or terminated during the past year, did the change in services affect your family member negatively?.....	122
Table Q64. Have the services or supports that your family member received been increased in the past year?	123
Table Q65. Are services and supports helping your family member to live a good life?	124
Table Q66. Has your family member moved from a Developmental Center (DC) to the community in the past 5 years?	125
Table Q67. How long has your family member lived in the community?.....	126
Table Q68. Are the services that were decided upon in the Individual Development Team (IDT) meeting (community transition planning meeting) being delivered to your family member in the community?	127

Executive Summary

The National Core Indicators (NCI) are standard measures used across states to assess the outcomes of services provided to individuals with intellectual/developmental disabilities and their families. Indicators address key areas of concern such as employment, respect/rights, service planning, community inclusion, choice, and health and safety. The data that result from NCI surveys are often used to inform strategic planning, produce legislative reports, and prioritize quality improvement initiatives. Many states also share the data with stakeholder groups such as Quality Councils and use the stakeholder feedback to help set priorities and establish policy direction.

The NCI Family/Guardian Survey is administered to families who have an adult (18 years or older) with a developmental disability who does not live in the family home and receives at least one service other than case management. Not all states that participate in NCI administer the Family/Guardian Survey on an annual basis. Of the 46 states, the District of Columbia who participated in NCI during the 2019-20 data collection cycle, 11 states¹ submitted a valid sample of Family/Guardian Survey data. **Please note: the NCI averages shown throughout this report are weighted.**²

In California, the Family/Guardian Survey is administered once every three years and data are collected from all 21 regional centers. The California statewide average is comprised of this data. This report provides a summary of results based on data submitted by June 30, 2020.

***Note:** All qualified Californians with a developmental disability have both a civil right and an individual entitlement to receive services from the California Department of Developmental Services. California law mandates that the intake process begin within 15 days of an individual's or family's request for services and that the Department of Developmental Services begin providing services within 120 days after intake. These statutory requirements make California's service system unique and could impact comparisons between its survey results and the results of other states.*

Important note on Impact of COVID-19

The 2019-20 NCI Family Survey data collection cycle began July 1, 2019 and ended June 30, 2020. Midway through data collection, in February 2020, COVID-19 began to spread across the United

¹ : Arizona (AZ), California (CA), Florida (FL), Georgia (GA), Maryland (MD), Minnesota (MN), New Hampshire (NH), North Carolina (NC), Pennsylvania (PA), South Dakota (SD), and Utah (UT).

² For more information see "Weighting" in the Methodology section.

States. Data collection for the NCI Family Surveys ***continued throughout the pandemic***. States begin data collection at various times throughout the year – some before the pandemic started and some after. Because the family surveys do not collect information on the date of survey completion, we cannot fully assess what impact the pandemic had on data collected at different times throughout the year. Additionally, we cannot determine whether the onset of COVID-19 impacted state samples. For instance, we do not know if certain populations were more or less likely to respond to the survey after February and we do not know whether or how responses were affected for specific questions for those who completed the survey after the pandemic began. While these data will serve as an important baseline, and meaningful way for states to understand the overall impact of services on families of individuals being served, these data should be read with caution.

Respondents of this survey are family members and/or guardians of adults who have IDD and receive at least one service in addition to case management from the state DD service system. The respondent *does not live with* the adult receiving services. A full list of regional center abbreviations can be found on [page vi](#). More NCI data findings are available at [National Core Indicators - CA Department of Developmental Services](#).

85%

Families say their family member participates in community activities

82%

Families say they use community resources outside of the regional center

Results

This section provides regional center, California, and NCI results for demographic and survey outcomes data.

Presentation of Data

In addition to basic demographic questions and questions on services and supports received, the survey contains six groupings of questions that probe specific areas of quality service provision: information and planning, access and delivery of services, choice and control, community connections, satisfaction, and outcomes. Each question is constructed so the respondent selects from either four possible responses ("always," "usually," "sometimes," "seldom/never") or two responses ("yes" or "no"). Respondents also have the option to indicate that they don't know the answer to a question or that the question is not applicable.

Demographic results are shown in table form with regional centers listed alphabetically. Outcomes are shown first with a chart depicting the CA Average. The charts are followed by accessible tables showing regional center outcomes listed alphabetically.

Regional centers with fewer than 20 respondents to a question **are not** included in outcome tables; however, their data **are** included in the CA Average. Fifty-five (55) surveys were received from unknown regional centers. Data from those surveys are included in the CA Average.

Note on NCI Averages: The NCI averages contained in this report are “weighted” means; their calculations reflect the relative population sizes of participating states and the states’ sample sizes. Prior to 2016-17, NCI averages were calculated as the simple arithmetic mean of all state means (an approach known as “average of averages”), so comparisons to past reports should be made with caution. See more about weighting in the Methodology section.

Note on language used in this report: “You” and “Respondent” refers to the person (usually a parent or guardian) filling out the survey. “Family Member” refers to the person receiving services whom the respondent is answering questions about in this survey.

Note on responses: All data are reported by the respondent based on their understanding of their family member’s demographics, diagnoses and personal characteristics.

Demographics

Note on responses: All data are reported by the respondent based on their understanding of their family member's demographics, diagnoses and personal characteristics.

Family Member

This section provides demographic information about the family member receiving services.

Family/Guardian Survey Results

Note on Significance: Statistical significance depends on both the amount by which a Regional Center differs from the average for a given item and the Regional Center's sample size for that item. There may be instances where Regional Center A's difference from the average is larger than Regional Center B's, but Regional Center B is shown as significantly different from the average whereas Regional Center A is not. The larger the sample size of a Regional Center, the smaller the difference needs to be for it to be statistically significant.

Information and Planning

Families and family members with disabilities have the information and support necessary to plan for their services and supports.

Note: Significance is based on “Always” or “Yes” response.

“You” and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

“Family Member” refers to the person receiving services whom the respondent is answering questions about in this survey.

Table Q1. Do you get enough information to take part in planning services for your family member?

Due to the COVID-19 pandemic and its impact to NCI data collection and sampling processes, we caution against using 2019-20 data to directly compare with past and future NCI data.

Access and Delivery of Services and Supports

Families and family members with disabilities get the services and supports they need.

Note: Significance is based on “Always” or “Yes” response.

“You” and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

“Family Member” refers to the person receiving services whom the respondent is answering questions about in this survey.

Table Q21. Are you or your family member able to contact his/her support workers when you want to?

Regional Center	Always	Usually	Sometimes	Seldom or Never	N

Due to the COVID-19 pandemic and its impact to NCI data collection and sampling processes, we caution against using 2019-20 data to directly compare with past and future NCI data.

Choice, Decision Making and Control

Families and family members with disabilities determine the services and supports they receive and the individuals or agencies who provide them.

Note: Significance is based on “Always” or “Yes” response.

“You” and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

“Family Member” refers to the person receiving services whom the respondent is answering questions about in this survey.

Table Q43. Does the agency providing residential services to your family member involve him/her in important decisions?

Regional Center	Always	Usually	Sometimes	Seldom or Never	N
ACRC	51%	28%	11%	11%	289

Involvement in the Community

Family members with disabilities use integrated community services and participate in everyday community activities.

Note: Significance is based on “Always” or “Yes” response.

“You” and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

“Family Member” refers to the person receiving services whom the respondent is answering questions about in this survey.

Table Q49. Does your family member take part in activities in the community?

Responses to this question might have been impacted by the COVID-19 pandemic.

Satisfaction With Services and Supports

Families and family members with disabilities receive adequate and satisfactory supports.

Note: Significance is based on “Always” or “Yes” response.

“You” and **“Respondent”** refers to the person (usually a parent or guardian) filling out the survey.

“Family Member” refers to the person receiving services whom the respondent is answering questions about in this survey.

Table Q54. Overall, are you satisfied with the services and supports your family member currently receives?

Responses to this question might have been impacted by the COVID-19 pandemic.

NCI History and Activities

This section briefly describes the history of the National Core Indicators and NCI surveys.

Overview of National Core Indicators

In December 1996, the National Association of State Directors of Developmental Disabilities Services (NASDDDS), in collaboration with the Human Services Research Institute (HSRI), launched the Core Indicators Project. The aim of the project was to support state developmental disabilities authorities in the development and implementation of performance and outcome indicators—and related data collection strategies—so that they could measure service delivery system performance. This effort, now called National Core Indicators (NCI), strives to provide states with valid and reliable tools to help improve system performance and better serve people with intellectual and developmental disabilities and their families. Moreover, NASDDDS' active sponsorship of NCI facilitates pooled knowledge, expertise, and resources among the states.

In 1997, 15 states convened to discuss the scope and content of a potential performance measurement framework. Directors and staff from these 15 states worked to identify the major domains and sub-domains of performance, indicators, measures, and data sources. The original 61 indicators, developed through a consensus process, were intended to provide a system-level “snapshot” of how well each state was performing. The states were guided by a set of criteria that was designed to select indicators that were:

1. Measurable
2. Related to issues the states had some ability to influence
3. Important to all individuals they served, regardless of level of disability or residential setting

During this initial phase, data collection protocols were developed and field-tested, including a face-to-face Adult In-Person Survey (for individuals age 18 and older who were receiving services) and a mail-out Adult Family Survey (for families who have an adult family member living at home). Seven states volunteered to pilot test the indicators. Eight additional states served on the steering committee.

Since the initial field test, NCI has expanded its scope to include outcomes of services for children with intellectual and developmental disabilities and their families. In addition, NCI continues to develop and refine the indicators and expand state participation. For more information about NCI states, technical reports, and other resources, please visit the NCI website at <https://www.nationalcoreindicators.org/>.

State Participation

During the 2019-20 data collection cycle, 46 states, the District of Columbia and 22 sub-state entities participated in NCI. State participation is entirely voluntary, and participating states are highlighted on the map below. Not all states participate in all surveys each year.

Figure 1. NCI State Participation 2019-20

The Core Indicators

The Core Indicators are the standard measures used across states to assess the outcomes of services provided to individuals and families. Indicators address key areas of concern, including employment, respect/rights, service planning, community inclusion, choice, and health and safety. An example of a Core Indicator would be, “The proportion of people who have a paid job in the community.” To see the complete list of Core Indicators, please visit the Indicators page on the NCI website at <https://www.nationalcoreindicators.org/indicators>.

Each survey instrument is designed to measure certain Core Indicators. While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the indicator that measures Community Inclusion (the proportion of people who regularly

participate in everyday integrated activities in their communities) is measured by several survey questions that ask about several separate community activities.

The current set of performance indicators includes approximately 100 individuals, family, system, and health and safety outcomes—outcomes that are important to understanding the overall health of public developmental disabilities agencies. Indicators are organized across five broad domains: Individual Outcomes; Health, Welfare, and Rights; Staff Stability and Competency; Family Outcomes; and System Performance. Each domain is broken down into sub-domains, as shown in the following table. Four data sources are used to assess outcomes: the Adult In-Person Survey, three Family Surveys, a Provider Survey (e.g., staff turnover), and system data from state administrative records (e.g., mortality rates).

The indicators have remained generally consistent over the last several years and thus can be used to analyze system-level trends over time. However, the NCI program is a dynamic effort that allows for measures to be added, dropped, or changed to reflect current and future priorities of participating states.

The data collection tools used to gather indicator data are regularly refined and tested to ensure they remain valid, reliable, and applicable to current issues within the field. Details on the design and testing of this tool are provided in the next section of this report.

Sub-Domains and Concern Statements

The following table lists the sub-domains under the “Family Outcomes” domain.

Figure 2. Family Survey Sub-Domains and Concern Statements

Sub-Domain	Concern Statement
Information and Planning	Families/family members with disabilities have the information and support necessary to plan for their services and supports.
Choice, Decision Making & Control	Families/family members with disabilities determine the services and supports they receive and the individuals or agencies who provide them.
Access & Support Delivery	Families/family members with disabilities get the services and supports they need.
Involvement in the Community	Family members with disabilities use integrated community services and participate in everyday community activities.
Satisfaction	Families/family members with disabilities receive adequate and satisfactory supports.
Outcomes	Individual and family supports make a positive difference in the lives of families.

How NCI Data Are Used

The Core Indicators provide information for quality management and are intended to be used in conjunction with other state data sources, such as risk management information, regional level performance data, results of provider monitoring processes, and administrative information gathered at the individual service coordination level. States typically use the indicator data to inform strategic planning, produce legislative reports, and prioritize quality improvement initiatives. Some states use NCI as a data source for supplemental performance measures in their home and community-based services (HCBS) waiver quality management systems and include the information in support of evidentiary reports to the Centers for Medicare & Medicaid Services (CMS). Many states share the indicator data with stakeholder groups such as Quality Councils and use the stakeholder feedback to help set priorities and establish policy direction. It is also important to note that states do not use the information in a punitive way to sanction service providers, nor do they use the results to remediate individual issues (unless specifically requested by the participant or required by law as in the case of suspected abuse, neglect, or mistreatment).

For more information on how to use these data for quality improvement, please see this handbook: [Using National Core Indicators for Quality Improvement Initiatives](#).¹⁵

¹⁵ Located on the National Core Indicators website: <https://www.nationalcoreindicators.org> → Resources → Using the Data

Caution and Limitations

This report does not provide benchmarks for acceptable or unacceptable levels of performance. Rather, it is up to each state to decide whether its score or percentage is an acceptable performance level. States that fall into the “below average” tier on any scale or indicator are not necessarily underperforming; instead, this placement indicates only that the state’s scale score or indicator percentage is significantly lower than the average of all states—where “significantly” means “not due to chance.” The results tables throughout this report display states’ scores relative to one another and show which states tend to have similar results. Notably, the difference between a “below average” state and the average across the other states may be very small, and it is up to public managers, policy-makers, and other stakeholders to decide whether a state’s result relative to the NCI Average suggests that changes or further investigation are necessary.

Moreover, the NCI Average should not be interpreted as defining “acceptable” levels of performance or satisfaction. Instead, it represents a multi-state “norm” that describes average levels of performance or satisfaction across the participating states. In some instances there are few significant differences among states; this denotes that the majority of states are performing similarly. Instances where several states’ results are especially high (considerably above the average level) may indicate that some states are attaining a level of performance that could serve as a guidepost for others.

Data from previous years are not presented in this report. Comparisons of results from year to year should be made with caution: even slight changes in wording or response options of certain questions may affect comparability of results from one year to the next; the mix of participating states differs slightly each year and may affect the NCI Averages; and states draw new samples each year rather than following the same group of individuals.

Methodology

This section describes the protocol used by states to select families to participate in the survey, administer the survey, and convey the resulting data for analysis. It also includes information on the statistical methods used by NCI staff to aggregate and analyze the data.

Sampling & Administration

States were asked to administer the Family/Guardian Survey by selecting a random sample of at least 1,000 families who:

1. Had an adult individual with a developmental disability NOT living in the family home; and
2. Received at least one direct service or support other than service coordination.

California sent a Family/Guardian Survey to all eligible families.¹⁶

Beginning in 2016-17, states had a choice of mailing paper surveys to families selected in their sample, sending a URL link for families to complete surveys online (referred to as “direct entry”), or a combination of both modes. Prior to that, states only had the option to mail paper surveys. A total of three states had at least a portion of surveys completed via direct entry for the 2019-20 data collection cycle.¹⁷

A sample size of 1,000 was recommended with the expectation of a 40% return rate or greater (yielding 400 or more usable responses per state). However, most states decided to sample more than 1,000 families, expecting a lower response rate than 40%. A final sample size of 400 would guarantee a +/- 5% margin of error and a 95% confidence level when interpreting the results. States with fewer than 1,000 potential respondent families were instructed to send surveys to all eligible families. With response rates lower than expected, we also included those states that submitted fewer than 400 surveys up to a margin of error of no greater than +/- 7%.

Weighting

Statistically, the term “average” refers to a calculated central or middle value of a set of numbers. In NCI reports, we use “NCI average” to demonstrate the typical performance of all the states that conducted the survey. Prior to the 2016-17 survey cycle, the NCI average was calculated as the simple arithmetic mean of all state means (an approach known as “average of averages”). The approach has since been enhanced to consider the relative numbers of people receiving services through participating states’ systems. The NCI averages contained in this report are “weighted”

¹⁶ See “Response Rates” for information on total surveys mailed and received by regional centers as well as each regional center’s margin of error.

¹⁷ States that used the direct entry or mail and direct entry options were: CA, MD, NC.

means; their calculations reflect the relative population sizes of participating states, as well as the sample sizes.

Applying statistical weights allows a state that provides services to a larger number of people (but is represented in the data by a sample of the same size as other states) to have a higher influence on the overall NCI average—that is, the state’s contribution to the NCI average is proportional to its service population. The weights used in calculations for this report were developed using each participating state’s number of survey respondents and its total survey-eligible population.

Data Entry and Analysis

Each state entered its survey responses into the Online Data Entry Survey Application (ODESA). All raw data files were reviewed for completeness, invalid responses were eliminated, and quality checks were performed. The data files were then cleaned and merged to create the national dataset.

Data were considered invalid, and therefore excluded, based on the following two criteria:

1. The respondent indicated the individual with an intellectual or developmental disability receiving services lived outside of the family home.
2. Demographic information was entered into the file, but no survey questions were answered.

Response Rates

During 2019-20, 11 states, including California, administered the Family/Guardian Survey and submitted a valid sample size for comparison—a sample that would yield a 95% confidence level with +/- 7% (7.49% or less) margin of error; their data are included in the NCI Averages in this report.

The following table shows response rates for California regional centers and across NCI states.

Figure 3. Family/Guardian Survey: State Response Rates¹⁸

State	Total Population	Surveys Sent	Complete Surveys	Response Rate ¹⁹	Margin of Error

SDRC	3,237	2,680	525	19.6%	3.92%
SGPRC	1,102	1,035	155	15.0%	7.30%
TCRC	2,030	1,563	323	20.7%	5.00%
VMRC	1,230	1,133	163	14.4%	7.15%
WRC	1,010	941	143	15.2%	7.60%
CA ²⁰	34,000	28,754	5,317	18.5%	1.23%
NCI states ²¹	97,528	49,183	9,435	24.5%	4.54%

¹⁸ Please note: The family surveys are mail out surveys or completed online by respondents who choose to take part in the survey. As such, the final sample is a sample of convenience and cannot be considered representative of the entire service population in the state.

¹⁹ State response rates are calculated as following: the number of complete surveys divided by total surveys sent in that state (type "RR1" as defined by the American Association for Public Opinion Research). For more details on the definition, please see the AAPOR report: https://www.aapor.org/AAPOR_Main/media/publications/Standard-Definitions20169theditionfinal.pdf

²⁰ The CA total includes 23 surveys from unknown regional centers.

²¹ Includes California; consistent with past years, the overall response rate and margin of error were calculated as the average of state averages, and the overall paper submission and direct entry submission rates were calculated as averages weighted by state total service population sizes (column 2 of this table).
