Service Codes and Applicable Measures

The matrix below identifies the service codes and applicable measures for each vendor number. "Yes" identifies a measure or compliance area marked in the rate structure attachment. Provider Capacity applies to eligible existing vendor numbers in Part A of Attachment A; the Initial Provider Survey applies instead to vendor numbers meeting Part B criteria as described in Attachment A. Audit and review requirements apply only when the payment thresholds or other applicable conditions are met. A blank compliance field does not establish an exemption. Determine each vendor number's requirements independently, including when an organization has vendor numbers in multiple service codes.

Code	Service	Capacity or Initial	Prevention and Wellness	Employment	EVV	HCBS	Audit or review
062	Personal Assistance	Yes			Yes		Yes
091	In-home/Mobile Day Program	Yes					Yes

952	Supported Employment – Individual	Yes		Yes			Yes
954	Work Activity Program	Yes				Yes	Yes

Home and Community-Based Services (HCBS) settings marked above are not the only settings subject to ongoing monitoring. Monitoring also includes any waiver-eligible support not listed above that is a provider-owned or provider-controlled residential setting, such as a unit privately rented by an individual from the provider supplying the individual's residential living supports.

The one-time incentive codes and service types are listed in Section A.5 of Attachment A.

Intermediate Care Facilities (ICFs) are not included in rate reform. Their participation in QIP data collection is voluntary. ICFs receive no payment for completing the Provider Capacity survey but may qualify for a one-time incentive for completing the Prevention and Wellness survey and meeting applicable eligibility requirements.
